COMPLETE SOURCE-BASED QUESTION ANALYSIS

MACAU DRIVING THEORY TEST

Shuffle-proof rules, answer-recognition shortcuts, exceptions & all-question reference

647 QUESTIONS · 5 FASCICULES · ANSWERS MATCHED TO PRINTED SOLUTION TABLES

Designed for an exam in which the **question and option wording stay the same** but **answer positions change**. No strategy in this manual relies on the original A/B/C/D position.

What you get

- A decision tree to recognise the right answer after shuffling.
- Reusable IF → THEN rules with verified question references.
- All exact-number rules: safety gaps, ages, distances, speeding, alcohol and fines.
- Traffic-sign families and illustrated right-of-way question clusters.
- A full answer-text index for every original question, including source page.
- Full-size reproduced sign and road-situation sheets for visual revision.

Source: Transport Bureau, Driving Theory Test, second version (2014), Fascicules I–V, as supplied. The booklets themselves state that the authority may revise the questions. This guide reflects those files; it does not establish current legal rules outside the PDFs.

01 Strategy: beat the shuffled answers

NEVER MEMORISE ORIGINAL ANSWER LETTERS

Memorise the **meaning** of the correct answer and the **decisive difference** between it and nearby wrong options. The original solution letters are used only to extract the source-approved text.

The five-step decision tree

1 · Read the stem polarity

If it asks “incorrect”, “wrong”, “not allowed”, or “prohibited”, identify the requested false / forbidden statement. Do not automatically choose the safest statement.

2 · Assign a question type

VISUAL = identify the sign or interpret the pictured vehicles; FACT = a precise number, definition or named legal exception; RULE = an action/priority principle.

3 · Locate the trigger

Notice the facts changing the answer: one-way vs two-way, uphill vs downhill, controlled vs uncontrolled crossing, ordinary road vs special bridge, first offence vs repeat.

4 · Match a meaning, not a letter

Scan the shuffled options for the exact rule you recall. Check that all qualifiers in the wording are satisfied.

5 · Verify distractors

For numeric questions, compare every digit, unit, threshold and suspension. For multi-statement answers, judge each underlying statement rather than blindly trusting “A and B”.

Where all 647 questions go

GROUP	VISUAL	FACT	RULE	TOTAL
A — Traffic signs	176	0	0	176
B — Road situations	66	0	0	66
C — Traffic regulations	0	88	62	150
D — Offences & penalties	0	128	11	139
E — Driving safety	0	21	95	116
TOTAL	242	237	168	647

Classification is by primary preparation method, not by mathematical difficulty: some visual situations also use general road rules; some fact questions are memorisable through patterns.

The highest-yield exam technique

Use three flashcard decks, not one mixed pile: (1) rule-trigger → required action; (2) number/threshold → exact value; (3) figure → meaning or vehicle order. When a question is wrong, record which single word or number misled you.

02 Answer wording: reliable cues vs traps

The booklets recycle a small number of correct-answer ideas across different situations. Recognise the principle, but do **not** assume a particular phrase is always right.

WHEN THE QUESTION SAYS…	RECOGNISE THE CORRECT IDEA	SOURCE
Visibility / hazard / surprise	Slow down, leave space, anticipate sudden movements	E Q10–15, Q38, Q45–49
Tailgating	Do not brake suddenly; gently warn / slow when safe	E Q6–9, Q12
Lane change or moving off	Signal in advance, check safety, move gradually	C Q50, Q57; E Q49, Q101
Emergency vehicle	Yield priority; stop if necessary	C Q33, Q76, Q115–117
Crossing pedestrian	Slow / stop and allow a person already crossing	C Q82–83; B Q64–66
Blocked junction	Wait before stop line instead of blocking crossing	E Q31; D Q30
Overtaking	Check others, pass normally on right, re-enter safely	C Q84–92; E Q108–116
Reversing or U-turn	Shortest safe manoeuvre; avoid forbidden locations	C Q97–99; D Q86–91
Large vehicle turning	Stay out of swept path; do not squeeze past	E Q73–80
Sudden failure	Avoid abrupt manoeuvres; control/slow/stop	E Q93–97

Three traps that defeat superficial keyword memorisation

- **“Which is incorrect?”** reverses the task. Group B contains nine of these: Q2, 17, 34, 47, 49, 54, 57, 63, 66.
- **“All of the above”** is not magic. It is correct in D Q2, Q3, Q53, Q108, Q109 and E Q72, Q80, Q97, but it is **not** the keyed answer to B Q65.
- **“A and B” / “A and C”** describes the original booklet choices. If option positions change, those letters cannot be used as a memory shortcut. This guide spells out the original members in a dedicated section.

03 Group A — sign recognition shortcuts

THE FIGURE IS THE QUESTION

All 176 Group A questions are primarily visual. Memorising the printed answer letter offers no protection if choices are shuffled. Use the reproduced 2 sign sheets near the end of this PDF and identify the sign **before** reading the choices.

FIGURES	VISUAL FAMILY / STUDY TRIGGER
1–39	Triangle warnings / junctions / danger (with exceptions such as give-way): “what hazard is ahead?”
40–82	Red-circle restrictions, vehicle-specific bans, dimensions and no-parking signs.
83–99	Parking/zone signs and the corresponding end of prohibitions.
100–111	Blue mandatory direction, routes and minimum speed, followed by end of minimum speed.
112–160	Parking, priority, route, services, directions, lanes and end-of-designation signs.
161–176	Yellow-box marking, traffic-officer signals, indicators, reflectors, dedicated lane and obstacle markings.

Lookalike pairs worth drilling

- **Q1 vs Q2:** bend right vs bend left. **Q3 vs Q4:** double bend starting right vs starting left.
- **Q20 vs Q21:** steep downhill vs steep uphill. Look at the slope, not the colour.
- **Q34 vs Q47:** “Give way” triangular sign vs “STOP” octagon. Yield and mandatory stop are not interchangeable.
- **Q40 vs Q41:** all vehicles prohibited (empty red ring) vs no entry (white horizontal bar).
- **Q50 vs Q51:** no parking (single diagonal slash) vs no stopping (red cross).
- **Q30 vs Q105:** roundabout ahead warning vs obligatory circular movement.
- **Q68 vs Q106 vs Q120:** maximum speed / mandatory minimum speed / recommended speed.
- **Q83 vs Q96:** start of authorised parking vs end of that parking designation.
- **Q117 vs Q35:** narrow road with priority vs warning that the roadway narrows.
- **Q155–160:** “end of” signs; practise with their respective start-of signs.

Group A exact figure-to-answer list is included in the all-question reference. Some signs have identical titles but different arrow directions; always use the actual picture as well as the named meaning.

04 Group B — 38 visual situations, 66 questions

ONE FIGURE OFTEN ANSWERS MULTIPLE QUESTIONS

Group B uses 38 numbered situations (Figures 3, 4, 6, 8–42). The same figure often returns with a different question stem. Learn each scene once, then answer the priority order, first/last vehicle, and “incorrect statement” variations.

Intersection sequence memory map

FIGURE	GROUP B Qs	SOURCE-KEYED ORDER / DIRECT ANSWER
11	8, 9	C and B-D-A
12	10, 11	B-D-C-A
13	12	D-A-B-C
14	13, 14	B-C-D-A
15	15, 16	C-D-A-B
16	17, 18	Vehicle A turns right
17	19	Vehicle A goes first, vehicle D goes last
18	20, 21	C-A-B
19	22, 23	C-B-A
20	24, 25	A and B-C
21	26, 27	A-B-C
22	28, 29	B-C-A
23	30	Vehicle A
24	31	C and A-B
25	32	A and B-C
26	33	Vehicle A, because it is from the left
27	34, 35	Vehicle B is wrong
28	36	Vehicle A and vehicle B should proceed simultaneously
29	37	May overtake but without crossing the solid line
30	38, 39	B-C-A
31	40, 41	A-B-C
32	42, 43	Vehicle B and vehicle C, vehicle A
33	44, 45	C-A-B

“A and B–C” in this table refers to **vehicle labels in the diagram**, which are part of the picture, not the shuffled multiple-choice letters. A and B proceed together, then C.

Nine reversed-polarity questions

“Which is incorrect?” appears at B Q2, Q17, Q34, Q47, Q49, Q54, Q57, Q63 and Q66. Underline “incorrect” before selecting anything.

Critical special clusters

• **Figures 3, 29, 36, 37:** overtaking and solid/broken lines. B Q1 = neither car may overtake in Fig 3. B Q37 = permitted without crossing solid line. B Q50 = permitted on broken line. B Q51 = abandon overtaking if opposing car approaches.

• **Figures 34–35:** U-turn permission/prohibition; “no sign” does not necessarily mean the manoeuvre is permitted.

• **Figure 38:** stopping vs parking on solid/broken yellow kerb markings. Check the word “stopping” separately from “parking”.

• **Figure 40:** stop is mandatory in picture B; the “proceed without stopping” statement is false.

• **Figure 41:** 1 = red (stop), 2 = amber, 3 = green; flashing amber while turning left = slow and turn carefully.

• **Figure 42:** pedestrian priority depends on the control and which picture (A vs B) is asked; B Q66 is a deliberately misleading “incorrect” statement.

The five original Group B diagram pages are reproduced at the end of the PDF. Use this section together with those pictures; a text priority string alone cannot substitute for seeing the traffic signs in the figure.

05 Group C — rules and definitions

Definitions: memorise paired contrasts

PAIR	RULE / KEYED FACT
Deceleration vs acceleration lane	Leave main road and slow DOWN (C Q14) vs ENTER main road and speed UP (C Q15).
Roadway vs pavement vs pedestrian crossing	Vehicle passage (Q7); elevated side for pedestrians (Q18); white-striped crossing (Q17).
Light vs heavy motor vehicle	Light: 350–3,500 kg and up to 9 seats incl. driver (Q22). Heavy: >3,500 kg OR >9 seats (Q23).
Light vs heavy motorcycle	Light: ≤50 cm³ or ≤4 kW and ≤45 km/h (Q24). Heavy: >50 cm³ / >45 km/h in booklet wording (Q25).
Public road / highway / expressway	Public access (Q1); higher usual limit (Q2); high-speed limited access with divider and designated signs (Q3).
Stopping vs parking	Stopping definition (Q100); parked = stationary other than stopping or traffic conditions (Q101).
Road signs hierarchy	Temporary signs > traffic lights > vertical signs > road markings (Q42). Officer orders must be obeyed (Q39).

Memorise: LEFT → YIELD LEFT → OVERTAKE RIGHT

- **Keep left:** drive on the left of the roadway (C Q51).
- **Priority from left:** yield to vehicles approaching from the left (C Q75).
- **Overtake right:** normally on the right (C Q84). **Exception:** pass on the left when the preceding driver signals right and leaves enough room (C Q85).
- **Turn left:** position left and take shortest safe path (C Q93).
- **Turn right, one-way:** position toward right side (C Q94). **Two-way:** position near centre line (C Q95).
- **Oncoming turning vehicles:** turning or U-turning driver yields (C Q77).
- **Narrow obstruction:** the driver bypassing the obstacle yields (C Q78). **Gradient:** downhill vehicle yields (C Q79).
- **Pedestrian already crossing:** allow passage even when you are otherwise permitted to proceed (C Q82–83).

High-yield numbers from Group C

TOPIC	EXACT SOURCE MEMORY
Vehicle classification	>25 km/h + 3 or more wheels (motor vehicle Q21); light 350–3,500 kg and ≤9 seats (Q22); heavy >3,500 kg OR >9 seats (Q23).
Mopeds / motorcycles	Moped motor 0.25 kW (Q35); light motorcycle ≤50 cm^3/≤4 kW/≤45 km/h (Q24).
Visibility & lighting	Poor visibility at <50 m whole-roadway visibility (Q56); sidelights 150 m (Q63); dipped light 30 m (Q65); full beam ≥100 m (Q67).
Large vehicle passing constraint	Width >2 m OR length >8 m = yield on unsuitable narrow roads (Q81).
Stop distances	5 m from junction (Q104); 10 m before/after bus stop sign (Q106).
People	Motorcycle passenger must be ≥6 years (Q125); front-seat age rule <12 (Q111); driving age 18, heavy 21 (Q136).
Licensing / offences	Less than 1 year motorcycle qualification: no passengers (Q127); <2 years licence and minor offence: re-test scenario (Q146).
Alcohol / parking	Alcohol threshold 0.5 g/L (Q141); serious ≥1.2 g/L (Q138); prolonged legal-space parking 15 days (Q149).

SOURCE-WORDING ALERT

C Q66 uses the answer “sidelights instead of dipped lights” for a well-lit road; D Q123 describes a different night-time lighting requirement. Do not replace either booklet answer with an oversimplified universal lighting rule. Match the exact question and qualifiers.

06 Group D — turn penalties into a ladder

This group is disproportionately exact-fact memorisation. Fines that look very similar can correspond to different locations, offence severity or repeat status. Use the trigger words **ordinary / bridge / first / again / above threshold**.

Speeding ladder: 4-stage recognition

WHEN	KEY DISTINCTION	PENALTY	QUESTION
Ordinary road; BELOW threshold	Motorcycle / light <30 km/h over; heavy <20 km/h over	600–2,500 patacas	D Q65–67
Ordinary road; AT/ABOVE threshold	Motorcycle / light ≥30 over; heavy ≥20 over	2,000–10,000 + suspension 6–12 months	D Q68–70
Special bridge; BELOW threshold	Same vehicle thresholds on bridge / approach viaduct	2,000–10,000 patacas	D Q71–73
Special bridge; AT/ABOVE threshold	Same thresholds, now on bridge / approach viaduct	4,000–20,000 + suspension 6–12 months	D Q74–76

Mnemonic: 30 / 30 / 20 for the speed threshold (motorcycle / light / heavy); move from ordinary road to special bridge, and the larger category of fine rises.

Alcohol penalty ladder

BLOOD ALCOHOL	KEYED PENALTY	SOURCE
0.5 to <0.8 g/L	2,000–10,000 patacas	D Q77
0.8 to <1.2 g/L	6,000–30,000 + suspension 2–6 months	D Q78
Repeat, below 0.8 g/L	4,000–20,000 + suspension 6–12 months	D Q79
Repeat, 0.8 to <1.2 g/L	12,000–60,000 + suspension 1–3 years	D Q80
≥1.2 g/L	Criminal-level: max imprisonment 1 year and 1–3 years driving ban (C Q138)	C Q138

Repeat-offence doubling pairs

OFFENCE FAMILY	FIRST	REPEAT	SOURCE
Fail to stop for officer	600–2,500	1,200–5,000 + 2–6 mo	D Q82–83
Unsafe U-turn/reverse in poor visibility	600–2,500	1,200–5,000 + 2–6 mo	D Q88–91
Fail to yield priority/emergency vehicles	600–2,500	1,200–5,000 + 2–6 mo	D Q92–95
Same issue on specially regulated bridge	1,000–5,000 + 2–6 mo	2,000–10,000 + 6–12 mo	D Q96–99
Fail to yield to pedestrian crossing	600–2,500	1,200–5,000 + 2–6 mo	D Q100–103
U-turn/reverse on bridge/flyover/tunnel	2,500–12,500 + 2–6 mo	5,000–25,000 + 6–12 mo	D Q86–87

“Double the money” is a useful pattern in these source pairs, **not** a universal penalty law. Suspension length often rises as well, and the initial bridge penalty may already include suspension.

Exact flat-fine anchors: learn families

AMOUNT	RECURRING KEYED QUESTIONS
300 patacas	Signal/notification and minor administrative breaches: D Q16,18,25,27,30,31,37,46,48–52,58–59,61,106,121–122,128,130.
600 patacas	Many motorcycle/passenger, lights and driving conduct offences: D Q14–15,23–24,26,28–29,32–36,38–45,47,54–57,115–116,118–120,123,138–139.
900 patacas	Several manoeuvre, right-of-way and overtaking offences: D Q6,10–12,20–22,117,132–137.
1,500 patacas	Full-beam headlight violations: D Q124–127.
3,000 patacas	Overloading ≥20%, dangerous-goods markings, insurance, detection devices: D Q7–8,60,105.

This is a selected high-frequency grouping, not a complete offence-to-fine statute. The complete Group D index appears later.

07 Group E — safety patterns and exceptions

Following-distance numbers

TRIGGER	REMEMBER	SOURCE
Normal, in seconds	Small vehicle ≥2 s; large vehicle ≥3 s	E Q4
Normal, using driving speed	Small vehicle: speed ÷ 2; large vehicle: speed − 20	E Q3
Fixed-point count	Count 2–3 seconds before reaching the same landmark	E Q5
Poor weather	Approx. 2 × normal following distance	E Q13
Dense fog / torrential rain	Less than 40 km/h in question bank	E Q11
Thin-water slippery road	Braking distance >2.5 × normal; speed ≥20% lower	E Q55
Behind large vehicle	Increase normal safe gap by 50%	E Q70
Expressway overtaking	≥10 km/h faster; signal for 3 s beforehand	E Q108–109

Slope + transmission = four-way memory chart

CASE	KEYED SEQUENCE	SOURCE
UPHILL / manual	First gear to restart; park with handbrake + lowest gear + wedges behind rear tyres.	E Q19,21
UPHILL / automatic	Low gear / L for climbing; park with handbrake + P + wedges behind rear tyres.	E Q20,22
DOWNHILL / manual	Use low gear / engine braking; park with handbrake + reverse + wedges in front of front tyres.	E Q23–24,26
DOWNHILL / automatic	Use engine braking early; park with handbrake + P + wedges in front of front tyres.	E Q25,27

Safe-choice decision patterns

• **Bad visibility:** slow gradually, leave a larger gap, avoid discretionary lane changes and hold the steering wheel firmly (E Q10–15).

• **Vehicle too close behind:** do not brake-check; signal and slow gently. When safe in the overtaking lane, move left to allow passing (E Q6–9).

• **Blocked green-light junction:** stay behind the stop line (E Q31). Amber: stop behind the line unless already in the intersection (E Q32).

• **Night glare:** look toward the left edge and dip beams for oncoming traffic (E Q39–42).

• **Large vehicle turning:** the rear sweeps through a wider path; avoid passing alongside its turning side (E Q73–80).

• **Brake failure:** hazard lights, engine braking and progressively lower gears; apply the handbrake gradually (E Q93).

• **Tyre puncture:** do not brake suddenly; hold wheel, warn followers and brake gently toward the roadside (E Q95–97).

• **Expressway lane change:** defer if another vehicle is approaching, or flashing you; do not speed up to block a lane change (E Q101–107).

Emergency advice and equipment descriptions are reproduced from the supplied 2014 booklet; if actual driving guidance has changed, official current safety training takes precedence.

08 Composite answers: the shuffle-risk register

SPECIAL EXCEPTION — OPTIONS THAT REFER TO OTHER OPTION LETTERS

Some source-approved answers literally say “A and B”, “B and C”, or “All of the above”. If your exam shuffles option order without rewriting those statements, the literal letters can become logically misleading. Learn the underlying original statements, and judge the displayed choices according to their current wording.

Group C · Question 36 | original keyed combination: A and B

Memorise these facts, not the letters: A: Supreme Committee of Transportation and the Land, Public works & Transport Bureau ; B: Public Security Police Bureau, Transport Bureau and Customs

Group C · Question 90 | original keyed combination: A and B

Memorise these facts, not the letters: A: At crests, corners or places of poor visibility ; B: On road of insufficient width

Group C · Question 97 | original keyed combination: B and C

Memorise these facts, not the letters: B: Crests ; C: Bridges, flyovers and tunnels

Group C · Question 100 | original keyed combination: As described in A, B and C

Memorise these facts, not the letters: A: A vehicle remains stationary for the time required to load and unload passengers ; B: A vehicle remains stationary for the time required to load and unload goods ; C: A vehicle remains stationary due to traffic conditions

Group C · Question 105 | original keyed combination: A, B and C

Memorise these facts, not the letters: A: Bridges, flyovers, tunnels and locations of poor visibility ; B: Pedestrian crossings indicated by signals ; C: Bicycle paths, separating facilities, guidance island, the center island of roundabout and places designated for the passage of pedestrians

Group C · Question 108 | original keyed combination: B and C

Memorise these facts, not the letters: B: Pavement and pedestrian zone ; C: Double parking on roadway

Group C · Question 114 | original keyed combination: B and C

Memorise these facts, not the letters: B: At the side close to the kerb or pavement where the vehicle is parked ; C: At the rear end of the vehicle

Group C · Question 126 | original keyed combination: A and B

Memorise these facts, not the letters: A: Passenger at positions other than the passenger seat ; B: Passengers at side seats

Group C · Question 133 | original keyed combination: A and B

Memorise these facts, not the letters: A: Hand pushed bicycle or baby carriage ; B: Wheel chair passing through

Group C · Question 147 | original keyed combination: B and C

Memorise these facts, not the letters: B: The condition of the driving license is poor ; C: The driving license expired

Group C · Question 148 | original keyed combination: A, B and C

Memorise these facts, not the letters: A: The vehicle was scraped after an incident ; B: The condition of the vehicle recognition document is poor ; C: The vehicle does not comply with the noise and air pollution regulations

Group D · Question 4 | original keyed combination: A and C.

Memorise these facts, not the letters: A: The cargo does not affect the correct identification of the signalling devices, lighting and license plate of the vehicle. ; C: The cargo remains within the frame of the vehicle.

Group D · Question 110 | original keyed combination: A and B.

Memorise these facts, not the letters: A: Driving in the wrong direction. ; B: Not respecting the obligation to stop imposed by the officer controlling the traffic, by the red light of traffic signals or by the compulsory stop sign at an intersection.

Group D · Question 111 | original keyed combination: A and C.

Memorise these facts, not the letters: A: Driving without lights when their use is obligatory. ; C: Using full-beam headlights in a way that they cause dazzle.

Group D · Question 113 | original keyed combination: A and B.

Memorise these facts, not the letters: A: Pay the Vehicle Usage Tax of the vehicle owned by this person and which is involved in the above-mentioned administrative offence. ; B: Register any other vehicle under the name of this person.

“All of the above” cases

• **Group D:** Q2, Q3, Q53, Q108, Q109. These are correct in the printed original questions, but check the substantive statements after any shuffle.

• **Group E:** Q72, Q80, Q97. These are correct in the printed original questions, but check the substantive statements after any shuffle.

Group B Q65 includes an “All of the above” option that is not the printed correct answer. This shows why answer-length and blanket “all” heuristics are unsafe.

09 Focused revision plan & mock-test protocol

PASS 1 — Build triggers

Study this manual sections 02–07. For each rule, recall one cue + one exception. Do not look at answer letters.

PASS 2 — Visual drill

Use sign sheets A34–35 and road drawings B16–20. Cover the answer index, name every sign/priority sequence aloud; check mistakes immediately.

PASS 3 — Numbers deck

Memorise Section 05–07 numeric anchors, then Group D fines. Make two-sided cards “condition → exact consequence”.

PASS 4 — Mixed shuffled options

For each question, ask “which exact wording matches the rule?” and “which distractor word makes the others wrong?” Keep a per-question mistake log.

PASS 5 — Close exceptions

Revisit every “incorrect” stem, compound answer, parking/stopping distinction, first vs repeat penalty, and source-specific lighting question.

PASS 6 — Simulated group audit

Practise all five groups separately. Target ≤2 errors in each group, not merely a good overall score, because of the booklet’s stated group-failure condition.

The 20-second last-check routine

- Did the question ask for **incorrect / prohibited / except**?
- Is it an **exact definition or number**, not a common-sense judgement?
- Did I distinguish **stopping vs parking**, **uphill vs downhill**, and **one-way vs two-way**?
- For penalties: **ordinary vs bridge**, **first vs repeat**, **less than vs equal to / above**?
- If choice says “A and B”, am I thinking of **what each underlying statement says** rather than memorised old positions?

PASS/FAIL THRESHOLD PRINTED IN THE SOURCE

The booklets state failure if **more than 8 wrong answers overall**, or **more than 2 wrong in a group**; blank / multiple-marked choices count as wrong. These instructions are taken from the 2014 supplied PDFs.

10 Complete 647-question answer-text reference

The following index covers every numbered question. It records the original correct answer **wording** (not the original letter), with its source booklet page. Use it to identify the matching text when online answer options are reordered. “V” = visual; “F” = fact or number; “R” = general rule.

QUICK INDEX INSTRUCTIONS

First read the stem and decide what it is asking. Find the corresponding question number below, memorise the full meaning shown in the correct-answer column, then locate that same meaning among the shuffled choices. The source PDF page number appears in parentheses for cross-checking.

How to use the three category tags

TAG	WHAT TO DO	GROUPS
V / visual	Study the actual drawing; recall sign meaning or vehicle priority.	A and B
F / fact	Memorise the exact definition, number, condition or penalty.	C, D and E
R / rule	Apply a reusable IF → THEN principle; check qualifiers.	C, D and E

In the reference tables, some long correct options wrap across several lines. This is intentional: the entire original correct option is preserved. Any original combined-choice answer is also unpacked earlier in Section 08.

GROUP A | Traffic signs | 176 questions

SIGN FIGURE	CORRECT SIGN MEANING (ORIGINAL TEXT)
1	Bend to right ahead
2	Bend to left ahead
3	Double bend ahead first to right
4	Double bend ahead first to left
5	Crossroad or T-junction ahead
6	With priority
7	T-junction ahead with priority
8	T-junction ahead with priority
9	T-junction ahead with priority
10	T-junction ahead with priority
11	Hump road
12	Sinking road
13	Hump road or gutter
14	Watch out for low road shoulder
15	Children ahead
16	Pedestrians ahead
17	Road narrows ahead
18	Road narrows ahead
19	Road narrows ahead
20	Steep hill downwards ahead
21	Steep hill upwards ahead
22	Road works ahead
23	Loose chippings ahead
24	Slippery road
25	Risk of falling or fallen rocks
26	Movable bridge
27	Quayside or precipice ahead
28	Lateral wind
29	Traffic lights ahead
30	Roundabout ahead
31	Exit for cyclists
32	Animals on road ahead
33	Airplane runway
34	Give way ahead
35	Two way traffic ahead

SIGN FIGURE	CORRECT SIGN MEANING (ORIGINAL TEXT)
36	Other danger ahead
37	Manned railway crossing
38	Unmanned railway crossing
39	Vehicles on track
40	All vehicles prohibited
41	No entry for all vehicles
42	No right turn
43	No left turn
44	No U-turn
45	No overtaking
46	No overtaking for heavy vehicles
47	Stop and give way
48	Customs - vehicles must stop at the sign
49	Vehicles must stop at the sign
50	No parking
51	No stopping
52	No parking on odd numbered days of the week
53	No parking on even numbered days of the week
54	No parking zone
55	No automobiles and heavy motorcycles with side cart
56	No two-wheeled heavy motorcycles
57	No automobiles and heavy motorcycles
58	No automobiles, heavy motorcycles and vehicles drawn by animals
59	No goods vehicles and vehicles drawn by animals
60	No pedestrians, animals, light motorcycles and cycles
61	No vehicles over ..... meters in height
62	No vehicles over ..... meters in width
63	Prohibited to maintain a following distance of less than.....meters with the preceding vehicle
64	No vehicles over ..... meters in length
65	No vehicles with load over .....tons
66	No vehicles over .....tons by gross weight
67	No vehicles with axle load over ..... tons
68	Prohibited to exceed ..... km/hr
69	No use of horn
70	Give way at narrow roads
71	No pedestrians

SIGN FIGURE	CORRECT SIGN MEANING (ORIGINAL TEXT)
72	No goods vehicles
73	No vehicles with trailer of 2 or more axles
74	No entry for trolleys
75	No motorized agricultural vehicles
76	No vehicles drawn by animals
77	No animals
78	No cyclists
79	No light motorcycles and cycles with motor

175	Markings for reserved lane
176	Markings indicating obstacles adjacent to the roadway

GROUP B | Road situations | 66 questions

Q / PAGE	QUESTION CUE	CORRECT ORIGINAL WORDING
1 (p3)	Which of the following vehicles may overtake? (See figure 3)	None of the vehicles
2 (p3)	Which of the following is incorrect? (See figure 3)	Vehicle B may overtake, because it overtakes only one vehicle
3 (p3)	When approaching a roundabout, which is the correct course to follow as indicated by the sign? (See figure 4)	Both courses
4 (p3)	When the vehicle turns right, which is the correct course to follow? (See figure 6)	Course B
5 (p3)	When the vehicle turns right, which is the correct course to follow? (See figure 8)	Course A
6 (p4)	Truck A and truck B are parking downhill. Which one parked correctly? (See figure 9)	Truck A, because its front wheels are turned against the pavement
7 (p4)	What is prohibited on this road? (See figure 10)	U-turn
8 (p4)	Which one is the correct priority sequence? (See figure 11)	C and B-D-A
9 (p4)	Which of the following is correct? (See figure11)	Vehicle C and vehicle B have priority
10 (p4)	Which one is the correct priority sequence? (See figure 12)	B-D-C-A
11 (p4)	Which of the following is correct? (See figure 12)	Vehicle B has priority, because it is on the left side of the road turning left
12 (p5)	Which one is the correct priority sequence? (See figure 13)	D-A-B-C
13 (p5)	Which one is the correct priority sequence? (See figure 14)	B-C-D-A
14 (p5)	Which vehicle goes first, which vehicle goes last? (See figure 14)	Vehicle B goes first, vehicle A goes last
15 (p5)	Which one is the correct priority sequence? (See figure 15)	C-D-A-B
16 (p5)	Which vehicle goes first? Which vehicle goes last? (See figure 15)	Vehicle C goes first and vehicle B goes last as regulated by traffic signs
17 (p5)	Which of the following is incorrect? (See figure 16)	Vehicle A turns right
18 (p6)	Which of the following is correct? (See figure 16)	Vehicle A and vehicle D go straight ahead, vehicle C and vehicle B turn right
19 (p6)	Which vehicle goes first, which vehicle goes last? (See figure 17)	Vehicle A goes first, vehicle D goes last
20 (p6)	Which one is the correct priority sequence? (See figure 18)	C-A-B
21 (p6)	Which of the following is correct? (See figure 18)	Vehicle C has priority
22 (p6)	Which one is the correct priority sequence? (See figure19)	C-B-A
23 (p6)	Which of the following is correct? (See figure 19)	Vehicle C goes straight ahead, vehicle B turns right
24 (p7)	Which one is the correct priority sequence? (See figure 20)	A and B-C
25 (p7)	Which of the following is correct? (See figure 20)	Vehicles A and B go first, vehicle C goes last
26 (p7)	Which one is the correct priority sequence? (See figure 21)	A-B-C

Q / PAGE	QUESTION CUE	CORRECT ORIGINAL WORDING
27 (p7)	Which of the following is correct? (See figure 21)	Vehicle A has priority, because there are no traffic from its left side
28 (p7)	Which one is the correct priority sequence? (See figure 22)	B-C-A
29 (p7)	Which of the following is correct? (See figure 22)	Vehicle B has priority, because there are no traffic from its left side
30 (p8)	Which vehicle violates traffic regulations? (See figure 23)	Vehicle A
31 (p8)	Which one is the correct priority sequence? (See figure 24)	C and A-B
32 (p8)	Which one is the correct priority sequence? (See figure 25)	A and B-C
33 (p8)	Which vehicle has priority? (See figure 26)	Vehicle A, because it is from the left
34 (p8)	Which of the following is incorrect? (See figure 27)	Vehicle B is wrong
35 (p8)	Which vehicle(s) drives correctly? (See figure 27)	Vehicle B
36 (p9)	Which vehicle has priority? (See figure 28)	Vehicle A and vehicle B should proceed simultaneously
37 (p9)	Vehicle B intends to overtake vehicle A. Which of the following is correct? (See figure 29)	May overtake but without crossing the solid line
38 (p9)	Which one is the correct priority sequence? (See figure 30)	B-C-A
39 (p9)	Which vehicle has priority? (See figure 30)	Vehicle B
40 (p9)	Which one is the correct priority sequence? (See figure 31)	A-B-C
41 (p9)	Which vehicle has priority? (See figure 31)	Vehicle A
42 (p10)	Which one is the correct priority sequence? (See figure 32)	Vehicle B and vehicle C, vehicle A
43 (p10)	Which vehicle has priority? (See figure 32)	Vehicle B and vehicle C
44 (p10)	Which vehicle goes first? Which vehicle goes last? (See figure 33)	Vehicle C goes first, vehicle B goes last
45 (p10)	Which one is the correct priority sequence? (See figure 33)	C-A-B
46 (p10)	Which of the following is correct? (See figure 34)	Vehicle A may U-turn
47 (p10)	Which of the following is incorrect? (See figure 34)	Vehicle B may U-turn because it is far from sign
48 (p11)	Which of the following is correct? (See figure 35)	In pictures A and B, both vehicles should not U-turn
49 (p11)	Which of the following is incorrect? (See figure 35)	In picture B, the vehicle may U-turn because there is no “No U-turn” sign
50 (p11)	May vehicle A overtakes vehicle B? (See figure 36)	May overtake and drive on the broken line
51 (p11)	When vehicle A intends to overtake vehicle B, vehicle C is approaching from the opposite direction. What should vehicle A do? (See figure 37)	Give up overtaking
52 (p11)	The solid and broken yellow line painted on the edge of the road indicates that... (See figure 38)	In picture B, stopping is allowed
53 (p12)	Which statement is correct? (See figure 38)	In pictures A and B, parking is not allowed
54 (p12)	Which of the following is incorrect? (See figure 38)	In picture B, parking and stopping is not allowed
55 (p12)	In the picture, both vehicles are parking on a way up: (See picture 39)	The wheels of vehicle B are in the correct position

Q / PAGE	QUESTION CUE	CORRECT ORIGINAL WORDING
56 (p12)	Which of the following is correct? (See figure 40)	In picture B, stopping is mandatory
57 (p12)	Which of the following is incorrect? (See figure 40)	In pictures A and B, proceed without stopping if there were no vehicles at the intersection
58 (p13)	If you were in a situation such as in picture B, you should... (See figure 40)	Stop under all circumstances
59 (p13)	Figure 41 shows a set of traffic lights signal. What is the colour of the lights as numbered?	1. red 2. amber 3. green
60 (p13)	When light number 1 is on, vehicles should...(See figure 41)	Stop in front of the stopping line
61 (p13)	When turning left, the amber light flashes, you should: (See figure 41)	Reduce speed, turn left carefully
62 (p13)	Figure 41 shows a set of traffic light signal. What is the meaning of each of the colours?	Light 1 means stop, prohibited to pass through
63 (p13)	Which of the following is incorrect? (See figure 41)	Light 3 is on: prohibited to pass through under all circumstances
64 (p14)	In picture B, when approaching a pedestrians crossing and the light signal allowing pedestrians to cross is on, vehicles should: (See figure 42)	Stop for the pedestrians to cross
65 (p14)	When approaching a pedestrians crossing, vehicles should... (See figure 42, picture A)	Reduce speed. Stop and give way to pedestrians crossing the road
66 (p14)	Which of the following is incorrect? (See figure 42)	In pictures A and B, vehicles should reduce speed and proceed when not affecting the safety of the pedestrians

GROUP C | Traffic regulations | 150 questions

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
1 /F (p3)	What is a public road?	Road opened for public access
2 /F (p3)	What is a highway?	Public road of maximum speed limit that exceeds the usual maximum speed limit adopted
3 /F (p3)	What is an expressway?	Public road for vehicles to travel at high speed with access restrictions, fitted with road dividers and signals indicating that it is an expressway
4 /F (p3)	What is a kerb?	The side of a roadway not designated for the passage of vehicles on the public road
5 /F (p3)	What is a simple road?	Road in non-urbanized area designated for local traffic
6 /F (p4)	What is an exclusive lane?	Lane designated for special transportation
7 /F (p4)	What is a roadway?	The part of a public road designated for the passage of vehicles
8 /F (p4)	What is a roadway centerline?	A longitudinal line dividing the roadway into two parts, each part allows for one direction of travel, disregard of any delimitation by signals
9 /F (p4)	What is a T-junction?	The joining or branching off area of public road
10 /F (p4)	What is an intersection?	The joining area of roadway where two or more public roads join or intersect on the same plane
11 /F (p5)	What is a crossroad?	The intersecting area on the same plane of public road
12 /F (p5)	What is a roundabout?	An area formed by crossroads or T-junctions, with a Roundabout indication sign for vehicle to travel in a circular direction
13 /F (p5)	What is a traffic lane?	The longitudinal zone of a roadway which allows a single column of vehicles to travel
14 /F (p5)	What is a deceleration lane?	A traffic lane outside the main road, formed by the widening up of roadway, for the deceleration of vehicles intending to leave a public road
15 /F (p6)	What is an acceleration lane?	A traffic lane formed by the widening up of roadway, for vehicles intending to enter a public road to accelerate properly and join the main road
16 /F (p6)	What is a special path?	A public road, with signal indications, partially or completely provide access to pedestrians or vehicles of specific category
17 /F (p6)	What is a pedestrian crossing?	A stripe shape region delimited by parallel white stripes, with proper signal indications, provided for pedestrians to cross a roadway
18 /F (p6)	What is a pavement?	The part of road surface of a public road, on the sides of a roadway and usually elevated from the ground, solely for the passage of pedestrians
19 /F (p6)	What is a pedestrian zone?	An area solely for the passage of pedestrians, usually, vehicles are prohibited to travel in the area
20 /F (p7)	What is a town?	A region with buildings and delimited by signs according to Rules and Regulations
21 /F (p7)	What is a motor vehicle?	A vehicle equipped with an engine and three or more wheels, of design maximum speed over 25km/h and able to run on public roads without tracks
22 /F (p7)	What is a light motor vehicle?	The design of a vehicle with a gross weight of no less than 350kg but not exceeding 3,500kg and a maximum capacity of 9 seats, driver included
23 /F (p7)	What is a heavy motor vehicle?	The design of a vehicle with a gross weight exceeding 3,500kg or a maximum capacity of more than 9 seats, driver included
24 /F (p8)	What is a light motorcycle?	A two- or three-wheeled vehicle equipped with a thermal engine of cylinder capacity not exceeding 50 cm3 or an electric motor of output not exceeding 4kW, of design maximum speed on level ground not exceeding 45km/h

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
25 /F (p8)	What is a heavy motorcycle?	A two- or three-wheeled vehicle, with or without a side cart, equipped with an internal combustion engine of cylinder capacity exceeding 50 cm3 or an electric motor of output not exceeding 4kW, of design maximum speed on level ground exceeding 45km/h
26 /F (p8)	A four-wheeled light motorcycle equipped with a mandatory-ignition type engine of cylinder capacity not exceeding 50 cm3 or other four-wheeled vehicle with internal combustion engine or electric motor of maximum output not exceeding 4kW, of design maximum speed on level ground does not exceed:	45km/h
27 /F (p9)	A four-wheeled heavy motorcycle is:	A four-wheeled vehicle with an engine of maximum output not exceeding 15kW
28 /F (p9)	What is an industrial mechanized vehicle?	A vehicle of two or more wheels equipped with an engine, used for projects or works of industrial nature and does not regularly run on public roads
29 /F (p9)	What is a trailer?	A vehicle hanged to and hauled by another mechanized vehicle
30 /F (p9)	What is a semi-trailer?	The front end of a vehicle hanged to and hauled by another mechanized vehicle that shares its load
31 /F (p10)	What is a tractor?	A vehicle of two or more wheels equipped with an engine and possesses no payload capability, mainly designed to produce traction
32 /F (p10)	What is an articulated vehicle?	A vehicle composed of two rigid components joined by hinge installment
33 /F (p10)	What is a prioritized vehicle?	Vehicles carrying out police, urgent rescue or urgent public affairs duties and with proper signals displayed
34 /F (p10)	A bicycle is:	A two- or three-wheeled vehicle self-propelled by the driver with foot pedals or similar device
35 /F (p11)	A moped is:	A bicycle equipped with an auxiliary electric motor of maximum continuous output of 0.25kW
36 /F (p11)	Which of the following entities, according to constitutive law or the supplement laws and regulations, has the corresponding road traffic authority:	A and B
37 /F (p11)	It is free to travel on the public road of the Macau Special Administrative Region except as restricted by:	Road Traffic Ordinance of Macau and its Supplementary
38 /R (p11)	It is free to travel on the public road of the Macau Special Administrative Region, but the public road users:	Are not allowed to execute any act that may obstruct traffic, affect the safety of other road users or cause inconvenience to other road users.
39 /R (p11)	Public road users must obey:	The orders of law enforcers who are authorized to direct and monitor traffic and had properly shown their identity.
40 /R (p12)	The installation of traffic signals on public roads:	Can only be carried out by the management entity or someone it authorizes
41 /F (p12)	Traffic signals supercede the:	Traffic Regulations
42 /F (p12)	As stipulated, traffic signals arranged to rank order from high to low be:	Temporary traffic signals used to alter the normal traffic regulations of the road, traffic lights, vertical signs, road markings
43 /F (p12)	Mopeds, four-wheeled light motorcycles and four-wheeled heavy motorcycles:	Must comply with the regulations of Supplementary Law before permitted to travel
44 /R (p12)	Bicycles equipped with a row of two or more wheels and with more than one pair of foot pedals:	Are prohibited to travel on public roads, except for locations explicitly permitted by the management entity
45 /R (p13)	Mechanized or non-mechanized roller carts:	Are prohibited to travel on public roads, except for locations explicitly permitted by the management entity
46 /R (p13)	Animals and vehicles towed by animals are prohibited on the public road, except:	When permitted by the management entity, and travel in accordance with the conditions as stipulated

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
47 /R (p13)	Vehicles traveling on public roads should:	Be driven by one driver
48 /R (p13)	Under all circumstances, a driver should be in control of the vehicle being driven, and must not performs:	Any acts or activities that may affects driving safety
49 /R (p13)	Should a driver use the mobile phone when driving?	No, except when using hand-free
50 /R (p14)	Before moving off or restart, a driver must:	Indicate his intention in advance and adopt the necessary accident prevention measures
51 /R (p14)	How should vehicles be driven on the road?	Vehicle should keep to the left of roadway, and as close to the kerb or pavement as possible
52 /R (p14)	On a two-way traffic roadway with three or more lanes:	Drivers are not allowed to use the lane in opposite traveling direction
53 /R (p14)	When a vehicle passes through a crossroad, T-junction or roundabout:	The center of the road should be on the right side of the driver
54 /R (p14)	When driving along, a driver should maintain adequate space with the vehicle ahead:	To avoid accident if the vehicle in front stop or decelerate suddenly
55 /R (p15)	When driving on roadway with vehicles traveling on the same or opposite direction, drivers should keep:	An adequate lateral distance to avoid accident
56 /F (p15)	What is the meaning of poor visibility?	When a driver cannot see the entire width of the roadway within a range of at least 50 meters, it is regarded as poor visibility
57 /R (p15)	A driver should give corresponding signals to clearly indicate his intention to other road users prior to deceleration, stopping, parking or executing any lateral maneuver on the vehicle especially before turning, lane changing or overtaking:	The signal should be sustained during the maneuver, and should be stopped immediately after the completion of the maneuver
58 /R (p15)	How to use the horn?	The horn should be short and use as less as possible
59 /R (p15)	Under normal circumstances, when should a horn be used?	To avoid accident, or act as a prior indication to the driver who intended to overtake
60 /F (p16)	Only Police cars, and vehicles carrying out rescue or urgent public services are allowed to use special sound alarm devices, offenders would be subjected to a fine of Macau dollars:	$3,000
61 /F (p16)	When driving at night in a well-lit area, the driver should:	Uses the dipped lights intermittently
62 /F (p16)	The specification of the illumination devices, light signal devices and reflective devices that must be provided by a vehicle is:	Decided by the Supplementary Laws
63 /F (p16)	What are sidelights?	Vehicle lights that are used to indicate the presence and width of a vehicle within a range of 150 meters
64 /F (p16)	When stopping and parking at night times or under poor visibility conditions, one should use:	The sidelights
65 /F (p17)	What are dipped lights?	Vehicle lights that illuminates the ground efficaciously within 30 meters in front and do not cause dazzling
66 /F (p17)	At night, when driving on a well lit road, one should use:	The sidelights instead of dipped lights
67 /F (p17)	What are high beams?	Vehicle lights that illuminate a distance of no less than 100 meters of the road in front
68 /R (p17)	Under what circumstances, the high beams should not be used:	When meeting with vehicles and pedestrians traveling in the opposite direction

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
69 /R (p18)	A driver should adjust the speed of the vehicle according to the characteristic and condition of the road, weather condition, traffic condition and other peculiar circumstances, so that his vehicle could be stopped safely within the unobstructed and observable front space, as well as:	To avoid any foreseeable obstructions under the normal circumstances
70 /R (p18)	If unsure about any sudden deceleration would cause danger to other road users, especially drivers of vehicles behind, driver should not decelerate at a sudden, but:	Except when necessary due to imminent danger
71 /R (p18)	A vehicle must obey the general highest speed limit as stated in the Supplementary Laws, but:	Must also comply with the highest or lowest speed limits as stated by an appropriate signal due to traffic condition
72 /R (p18)	Which of the following location should a driver decelerates when approaching, disregard of the subscribed highest speed limit?	Passage on roadways marked for the crossing of pedestrians
73 /R (p18)	A driver should not keep at an unreasonably slow speed and obstructed the other road users or:	Violates the lowest speed limit
74 /R (p19)	The driver obliged to give way should decelerate or stop when necessary, or even reverse when meet, so that other vehicle:	Is able to pass through without altering speed or direction
75 /R (p19)	A driver should give way to vehicles from which direction?	Left side
76 /R (p19)	Under which of the following situations that a driver should give way?	When come across priority vehicles or police motorcades
77 /R (p19)	When two drivers traveling in opposite directions:	The driver intends to turn or U-turn should give way
78 /R (p19)	When two vehicles traveling in opposite directions are unable to pass through because part of the roadway is blocked:	The driver who has to bypass the obstacles should decelerate or stop, in order to let the oncoming vehicle passes through first
79 /R (p20)	Under normal circumstances, on a gradient road:	The driver going down hill should give way
80 /R (p20)	When two vehicles traveling in opposite directions are unable to pass through when meet and required to reverse:	The vehicle closest to the meeting point should reverse
81 /F (p20)	If the usable width, uneven condition or the maintenance condition of a roadway does not allow for the safe pass through of vehicle:	The driver of vehicle or vehicle combination of total width exceeding 2 meters or the total length exceeds 8 meters loading included, should decelerate or stop, so as to let the other vehicles to pass through
82 /R (p20)	Upon approaching a pedestrian crossing indicated by signal, if it is controlled by traffic lights or traffic police for the passing through of vehicles and pedestrians, the driver:	Should let pedestrians already on the crossing to pass through, even when authorized to proceed
83 /R (p21)	Upon approaching a pedestrian crossing indicated by signal, if it is not controlled by traffic lights or traffic police for the passing through of vehicles, the driver:	Should decelerate or stop when necessary, so as to let pedestrians on the crossing to pass through
84 /R (p21)	Under normal circumstances, a vehicle should overtake on which side?	Right side
85 /R (p21)	If the driver of the vehicle being overtake had indicated to turn right, and leave out space on the left side of the roadway:	Should overtake that vehicle on its left side
86 /R (p21)	Before overtaking, a driver must ensure:	That he is not being overtake by other driver
87 /R (p21)	After overtaking, the driver:	Should pull back to the original traffic lane as soon as possible when not endangering other road users
88 /R (p22)	If not obstructed by obstacles, a driver should facilitate others to overtake:	And keep well to the left when driving

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
89 /R (p22)	If the usable width, uneven condition or the maintenance condition of a roadway does not allow for safe overtaking:	Heavy motor vehicle and industrial mechanized vehicle should decelerate or stop, so as to facilitate others to overtake
90 /F (p22)	In which of the following location or situation overtaking is prohibited?	A and B
91 /R (p22)	Under normal conditions, which of the following location may overtake?	In an expressway
92 /R (p22)	Present legal regulation stipulated that:	It is prohibited to overtake an overtaking vehicle
93 /R (p22)	A driver intending to turn left should keep in advance and close to:	The left side of roadway, and turn left by the shortest path
94 /R (p23)	The following action should be taken in advance when a driver intending to turn right on a one-way road:	Keep to the right side of the roadway, then turn into the roadway along the side in the direction of travel
95 /R (p23)	A driver intending to turn right on a two-way road should:	Keep as close to the center line of the roadway as possible, then turn into the roadway along the side in the direction of travel
96 /R (p23)	When turning right from a two-way road into another two-way road, the center point of the intersection should be at the driver’s:	Right side
97 /F (p23)	U-turn is not allowed in which of the following locations?	B and C
98 /R (p24)	Under normal circumstances, which of the following locations are suitable for U-turn?	Wide roads
99 /R (p24)	Reversing can only be an auxiliary or supporting operation, and should:	Be carried out in the shortest path and not affecting the traffic
100 /F (p24)	What is the definition of stopping?	As described in A, B and C
101 /R (p24)	What is the definition of parking?	A vehicle remains stationary, not because of stopping or traffic condition
102 /R (p24)	On the part of a roadway designated for stopping or parking, vehicles:	Should park in the direction of travel
103 /R (p25)	Before leaving a parked vehicle, the driver should reserves:	Enough space for other vehicles to leave the parking space or park into an empty parking space
104 /F (p25)	At intersections or joining place of roadways, it is prohibited to:	Stop within 5 meters
105 /F (p25)	Which of the following location is prohibited to stop?	A, B and C
106 /F (p25)	Before and after the sign indicating a stopping place for mass passenger transit vehicles:	It is prohibited to stop within 10 meters
107 /F (p25)	In general, illegal stopping on bridges, flyover or in tunnel will be subjected to a fine of:	$900
108 /F (p26)	In which of the following location or situation, parking is prohibited?	B and C
109 /R (p26)	The number of passengers carried must not exceed the seating capacity of a vehicle:	And prohibited to carry passengers in such a manner that may endanger passenger or driving safety
110 /F (p26)	Unless conforms to the conditions as stipulated in the Supplementary Laws, it is prohibited to carry passengers in positions other than passenger seats:	But children hug at the rear seats are not under this restriction
111 /F (p26)	It is prohibited to carry children under the age of 12 in the front seat of automobile, except when conforms to the following condition:	The automobile has no rear seats
112 /F (p26)	Present legal regulations stipulated that:	Drivers of light vehicle and front seat passengers must wear seat belt

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
113 /F (p27)	Failed to or improper use of the safety belts would be subjected to a fine of:	$300
114 /R (p27)	The loading and unloading of goods on public roads should be:	B and C
115 /R (p27)	Due to the necessity of duties, driver of priority vehicle may not obey the traffic regulations and signals, but must:	Follows the signals given by traffic police
116 /R (p27)	When come across priority vehicles, public road users:	Should give way, and stop when necessary, in order to let these vehicles to pass through
117 /R (p27)	In order for priority vehicles to pass through jammed traffic path, drivers should resign his _____ of roadway at the direction of travel	Right flank
118 /R (p27)	When a vehicle is unable to move because of breakdown or accident, the driver should move the vehicle to the _____ along the roadway:	Left flank
119 /R (p28)	When failed to park or remove of an unmovable vehicle due to breakdown or incident, the driver should take the necessary measures:	Especially the issue of the hazard warning flash signal, so that other road users may realize the vehicle’s existence
120 /F (p28)	At night or when the visibility is poor, vehicle without illumination due to faulty lamps is prohibited to run, offender may be subjected to a fine of:	$600
121 /R (p28)	Drivers of heavy motorcycles, light motorcycles or bicycles:	Must keep the hands on the handle bar, except when signaling his driving intentions
122 /R (p28)	On pavement or path for pedestrians, drivers of heavy motorcycle and light motorcycle are not allowed to:	Drive or hand pushes such vehicles
123 /F (p29)	Drivers and passengers of light motorcycles and heavy motorcycles must protect their heads by helmet:	Wearing a helmet not properly buckled would be regarded as not using a helmet
124 /F (p29)	Helmet model should be approved by management entity, the use of unapproved helmet:	Would be regarded as not using a helmet
125 /F (p29)	It is prohibited for heavy motorcycles and light motorcycles to carry:	Passengers under the age of 6
126 /F (p29)	Heavy motorcycle and light motorcycle is prohibited to carry:	A and B
127 /F (p29)	Driver possesses driving qualification of heavy motorcycle or light motorcycle for less than one year is prohibited:	To carry passenger by such vehicle
128 /F (p30)	The Supplementary Laws may stipulated that driver having driving qualification of heavy motorcycle or light motorcycle for less than one year:	Must install identification sign on the vehicle driven
129 /F (p30)	Bicycles are prohibited:	To carry passengers
130 /R (p30)	Driver of heavy motorcycle, light motorcycle or bicycle must not carry:	Objects that may affect driving, causing danger to people or things, or else influence traffic
131 /R (p30)	When vehicles are directed by traffic lights or traffic police, pedestrians:	Should not cross the roadway when vehicles are allowed to pass through
132 /F (p30)	At pedestrian crossings without proper signals, provided the passage of vehicles not affected, pedestrian may cross the roadway beyond the pedestrian crossing within:	50 meters
133 /R (p31)	Which of the following situation is equivalent to the passing through of pedestrian?	A and B

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
134 /F (p31)	Document that proofs the qualifications to drive mechanized vehicles is called:	Driving license
135 /F (p31)	Learner driver holding a valid learner’s driving license:	May drive with a driving instructor on public roads that permit learning to drive
136 /F (p31)	Applicants for the driving license of mechanized vehicle must:	Be 18 years of age, for driving license of heavy vehicle, must be 21 years of age
137 /F (p31)	Applicants for the driving license of mechanized vehicle must tally one of the important documents:	Holding the Resident’s Identification of the Macau Special Administrative Region or Proof of legal stay in the Macau Special Administrative Region
138 /F (p32)	Any person driving a vehicle on the public road with an alcohol content of equal to or more than 1.2 grams per liter of blood may be subjected to a highest penalty of:	1 year imprisonment and prohibited to drive for 1 to 3 years
139 /F (p32)	Any person driving a vehicle on the public road under the influence of narcotics or neuralgic substances and the taking of such constitute a crime by law, may be subjected to the highest penalty of:	One year imprisonment and prohibited to drive for one to three years
140 /F (p32)	Driving mechanized vehicles or industrial mechanized vehicles on public roads without the required qualifications, may be subjected to a fine of:	$5,000 to $25,000
141 /F (p32)	It is prohibited to drive on the public road under the influence of alcohol, the lowest standard of “under the influence of alcohol” means that the alcohol content per liter of blood of a driver is equal to or more than:	0.5 grams
142 /F (p32)	Driver does not obey a traffic red light or follow the mandatory stop as stipulated by the stop signal at intersection, is subjected to a fine of $1,000 to $5,000. Repeated offender is subjected to a fine of:	$2,000 to $10,000 and prohibited to drive for two to six months
143 /F (p33)	Driving counter to the legal direction, is subjected to a fine of $1,000 to $5,000. Repeated offender is subjected to a fine of:	$2,000 to $10,000 and prohibited to drive for two to six months
144 /F (p33)	Making U-turn or reversing on bridges, flyovers or in tunnels is subjected to a fine of $2,500 to $12,500 and is prohibited to drive for:	Two to six months
145 /F (p33)	Overtaking before or inside a pedestrian crossing indicated by signal is subjected to a fine of $600 to $2,500. Repeated offender is subjected to a fine of $1,200 to $5,000 and is prohibited to drive for:	Two to six months
146 /F (p33)	Driver qualified to drive a certain category of vehicle for less than 2 years, committed any punishable slight violations when driving vehicle of that category would be punished by:	The Court ordering for a re-test
147 /F (p33)	In which of the following, can the traffic laws enforcement personnel detain a driver's license:	B and C
148 /F (p34)	In which of the following situation, can the traffic laws enforcement personnel detains the vehicle recognition document:	A, B and C
149 /F (p34)	It is regarded as overtime parking when parked in a legal parking space continuously for 15 days. Vehicles parked overtime will:	Be removed from the public road
150 /F (p34)	Vehicles parked in which of the following location or situation will be locked or removed from the public road:	At stopping place for mass passenger transit vehicles

GROUP D | Traffic offences / penalties | 139 questions

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
1 /R (p3)	When loading and arranging cargo you should pay special attention to ensure:	The vehicle’s balance when it is stationary or in motion.
2 /R (p3)	When loading and arranging cargo you should pay special attention to ensure that:	All of the above.
3 /R (p3)	When loading and arranging cargo, you should pay special attention to ensure that, in terms of stability:	All of the above.
4 /R (p3)	In terms of a passenger vehicle, when loading and arranging cargo you should pay special attention to ensure that:	A and C.
5 /F (p3)	When loading and arranging cargo, you should pay special attention to ensure that, in terms of height:	The cargo is within 4 meters from the ground.
6 /F (p4)	It is forbidden to transport cargo heavier than the legal maximum limit. Violation will be subject to a fine of:	900 patacas
7 /F (p4)	The transport of cargo which exceeds, in 20% or more, the legal maximum weight limit will be subject to a fine of:	3,000 patacas
8 /F (p4)	Vehicles used for the transportation of dangerous goods have to be properly marked. Violation will be subject to a fine of:	3,000 patacas
9 /R (p4)	In the compartment of a vehicle transporting dangerous goods:	Passengers and dangerous goods cannot be transported simultaneously.
10 /F (p4)	Meat for consumption can only be transported by vehicles with enclosed compartment under perfect hygienic conditions. Violation will be subject to a fine of:	900 patacas

Violation will be subject to a fine of:	900 patacas
13 /R (p5)	Before the vehicle has come to a complete stop:	It is forbidden to enter/get off it or to load/unload its cargo.
14 /F (p5)	Before the vehicle has come to a complete stop, it is forbidden to enter/get off it or to load/unload its cargo. Violation will be subject to a fine of:	600 patacas
15 /F (p6)	Only when no danger or inconvenience will be caused to other roads users can there be taking up/putting down of passengers or loading/unloading of cargo. These actions are to be carried out as quickly as possible, except when the vehicle has been properly parked or that the cargo does not occupy the lane. Violation will be subject to a fine of:	600 patacas
16 /F (p6)	The transport of passengers whose number exceeds that of the maximum capacity of the vehicle and, in a way that compromise the safety of the passengers or affect driving safety, are forbidden. The offending driver will be fined, for every passenger:	300 patacas

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
17 /R (p6)	It is forbidden for the driver of a vehicle and its passengers to:	Before the vehicle has come to a complete stop, open its doors or maintain them open.
18 /F (p6)	Anyone who opens the doors of a vehicle, maintain them open or get off the vehicle without first ensuring that doing so will not cause danger or inconvenience to other road users, will be fined:	300 patacas
19 /F (p7)	An offender who, continuously or repeatedly, parks illegally on the same spot will be considered as having committed a separate administrative offence, for every illegal act detected again in:	Every 24 hours.
20 /F (p7)	Reversing can only be used as an auxiliary manoeuvre or one of recourse. It is to be done slowly, in the shortest route and in a way that does not affect traffic. Violation will be subject to a fine of:	900 patacas
21 /F (p7)	A driver who intends to turn left shall steer, in advance and as much as possible, to the left edge of the lane and then make the turn in the shortest route. Failing to do so will be fined:	900 patacas
22 /F (p7)	A driver who intends to turn right shall steer in advance to the right side if the road is one way or, to the centre line as much as possible if it is two way and then follow the driving direction to make the turn. Failing to do so will be fined:	900 patacas
23 /F (p7)	A driver shall slow down or stop so as to allow a mass transit vehicle to move off from its marked stop. Failing to do so will be fined:	600 patacas
24 /F (p8)	The driver of a mass transit vehicle shall stop at the spot adapted or created for this purpose. When such spot does not exist, the driver shall stop as close as possible to the roadside or sidewalk on the left of the carriageway. Failing to do so will be fined:	600 patacas
25 /F (p8)	Before moving off, the driver of a mass transit vehicle shall signal such intention and take necessary precautions so as to prevent accidents. Failing to do so will be fined:	300 patacas
26 /F (p8)	When a break down or accident forced a vehicle to stop, its driver shall steer it to the far left of the carriageway, unless the vehicle is literally unmovable. Failing to do so will be fined:	600 patacas
27 /F (p8)	When a vehicle cannot be properly parked or removed, its driver shall take necessary measures - especially, to turn on the hazard warning flashers - to inform other road users about its presence. Failing to do so will be fined:	300 patacas
28 /F (p8)	If the vehicle fails to start, its driver shall take measures to have it removed from the road as soon as possible. Failing to do so will be fined:	600 patacas
29 /F (p9)	Except when the repair can be easily and quickly carried out and that it is indispensable for the vehicle to continue travelling, it is forbidden to repair a vehicle on public road. Violation will be subject to a fine of:	600 patacas
30 /F (p9)	Even with right-of-way or that the signal lights permit but, when it can be foreseen that after driving into the four-way intersection or the three-way junction, the vehicle will be immobilized by the heavy traffic there, its driver shall avoid doing so. Violation will be subject to a fine of:	300 patacas

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
31 /F (p9)	When the corridor is designated for a specific type of vehicles, they shall use it while vehicles other than this type shall stay away from it. Violation will be subject to a fine of:	300 patacas
32 /F (p9)	It is forbidden for mopeds and motorcycles to carry passengers who are under 6 years old. Violation will be subject to a fine of:	600 patacas
33 /F (p9)	Only the passenger seat on the moped or motorcycle can be used for carrying passenger. Violation will be subject to a fine of:	600 patacas
34 /F (p10)	It is forbidden for mopeds and motorcycles to carry passengers who are sitting on one side. Violation will be subject to a fine of:	600 patacas
35 /F (p10)	It is forbidden the driver of a moped/motorcycle to carry passenger on it when the qualification to drive it has been obtained for less than a year. Violation will be subject to a fine of:	600 patacas
36 /F (p10)	It is obligatory to place an identification mark on the moped/motorcycle to show that its driver has obtained the license to drive it for less than a year. Failing to do so will be fined:	600 patacas
37 /F (p10)	It is forbidden for bicycles to carry passengers. Violation will be subject to a fine of:	300 patacas
38 /F (p10)	It is obligatory for both drivers and passengers, of mopeds and motorcycles, to wear helmets for protection. However, if the helmet is not securely fastened, it is considered as not wearing one and will be fined:	600 patacas
39 /F (p11)	After the helmet models have been approved by the authorities, the use of an unapproved model is considered as not wearing a helmet and will be fined:	600 patacas
40 /F (p11)	If the helmet has a visor, it shall be of unbreakable, transparent and non-reflective material so that the face of the person wearing the helmet, can be easily seen. Violation will be subject to a fine of:	600 patacas
41 /F (p11)	Except when giving signals, the driver of a moped, motorcycle or bicycle shall keep both hands on the handlebar while driving. Failing to do so will be fined:	600 patacas
42 /F (p11)	The driver of a moped, motorcycle or bicycle shall keep both feet on the pedals or footrests while driving. Failing to do so will be fined:	600 patacas
43 /F (p11)	The driver of a moped, motorcycle or bicycle shall not use it for hauling nor allow it to be hauled. Violation will be subject to a fine of:	600 patacas
44 /F (p12)	Except when the bicycles are travelling on a special lane, the driver of a moped, motorcycle or bicycle shall not travel alongside another vehicle. Violation will be subject to a fine of:	600 patacas
45 /F (p12)	The driver of a moped or motorcycle shall not drive it on any sidewalk or pedestrian footpath. Violation will be subject to a fine of:	600 patacas
46 /F (p12)	The driver of a moped or motorcycle shall not transit it, by means of hand push, on any sidewalk or pedestrian footpath. Violation will be subject to a fine of:	300 patacas

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
47 /F (p12)	The driver of a moped, motorcycle or bicycle shall not use it to carry things which may affect driving, pose danger to people or other things, or affect traffic. Violation will be subject to a fine of:	600 patacas
48 /F (p12)	Pedestrians shall use sidewalks, footpaths, pedestrian zones and links for transit. Failing to do so will be fined:	300 patacas
49 /F (p13)	Pedestrians shall walk on the left side of places destined for their use. Failing to do so will be fined:	300 patacas
50 /F (p13)	Pedestrians shall obey the traffic lights at pedestrian crossings if installed. Failing to do so will be fined:	300 patacas
51 /F (p13)	When, only the transit of vehicles are being directed by the light signals or the officers controlling the traffic, the pedestrians shall not cross the road when the vehicles have the permission to advance. Violation will be subject to a fine of:	300 patacas
52 /F (p13)	Pedestrians can only cross the road without using the pedestrian crossing when a properly marked one does not exist within 50 meters of distance, when traffic is not affected and when it is done in the shortest route and time. Failing to do so will be fined:	300 patacas
53 /F (p13)	Which of the following action is equivalent to the transit of pedestrians?	All of the above.
54 /F (p14)	The transit of motor vehicles with smoke or exhaust emissions exceeding the limit stipulated by supplementary regulation is forbidden. Violation will be subject to a fine of:	600 patacas
55 /F (p14)	The transit of motor vehicles that leak oil or other pollutants is forbidden. Violation will be subject to a fine of:	600 patacas
56 /F (p14)	The transit of motor vehicles with a noise level exceeding the maximum limit stipulated by supplementary regulation is forbidden. Violation will be subject to a fine of:	600 patacas
57 /F (p14)	When operating radio receivers or audio devices installed on a vehicle, the sound emitted by them shall not exceed the maximum limit stipulated by supplementary regulation. Violation will be subject to a fine of:	600 patacas
58 /F (p14)	When driving, the driver shall carry along a valid driving licence or corresponding document as temporary substitute. Failing to do so will be fined:	300 patacas
59 /F (p15)	One shall carry along the learner´s permit when taking driving lessons. Failing to do so will be fined:	300 patacas
60 /F (p15)	As stipulated by supplementary regulations, motor vehicles and their trailers can only transit on public roads after they have been covered by civil liability insurance policy. Violation will be subject to a fine of:	3,000 patacas
61 /F (p15)	For every insurance policy bought, a certificate in legally approved format will be issued. The driver shall bring along this certificate when travelling on public roads. Failing to do so will be fined:	300 patacas
62 /F (p15)	Those who abandon the victim of a traffic accident caused by them can face a maximum penalty of:	Three-year imprisonment or a fine.

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
63 /F (p15)	Those who, after having involved in a traffic accident, attempt to escape from civil or criminal responsibility, by using means other than those that are legal and available to them, can face a maximum penalty of:	One-year imprisonment or a 120-day fine.
64 /F (p16)	The offense of driving a motor vehicle or an industrial vehicle on public road without the required qualifications, when repeated, can face a maximum penalty of:	Six-month imprisonment or a fine of 10,000 to 50,000 patacas.
65 /F (p16)	Driving a moped or a motorcycle at a speed which exceeds the maximum speed limit by less than 30km/h will be subject to a fine of _____.	600 to 2,500 patacas.
66 /F (p16)	Driving a light vehicle at a speed which exceeds the maximum speed limit by less than 30km/h will be subject to a fine of _____.	600 to 2,500 patacas.
67 /F (p16)	Driving a heavy vehicle at a speed which exceeds the maximum speed limit by less than 20km/h will be subject to a fine of _____.	600 to 2,500 patacas.
68 /F (p16)	Driving a moped or a motorcycle at a speed equals to or more than 30km/h above the maximum speed limit will be subject to:	A fine of 2,000 to 10,000 patacas and be suspended from driving for six months to one year.
69 /F (p17)	Driving a light vehicle at a speed equals to or more than 30km/h above the maximum speed limit will be subject to:	A fine of 2,000 to 10,000 patacas and be suspended from driving for six months to one year.
70 /F (p17)	Driving a heavy vehicle at a speed equals to or more than 20km/h above the maximum speed limit will be subject to:	A fine of 2,000 to 10,000 patacas and be suspended from driving for six months to one year.
71 /F (p17)	Driving a moped or a motorcycle on bridges regulated by special system and on their approach viaducts, at a speed which exceeds their maximum speed limit by less than 30km/h will be subject to a fine of _____.	2,000 to 10,000 patacas.
72 /F (p17)	Driving a light vehicle on bridges regulated by special system and on their approach viaducts, at a speed which exceeds their maximum speed limit by less than 30km/h will be subject to a fine of _____.	2,000 to 10,000 patacas.
73 /F (p18)	Driving a heavy vehicle on bridges regulated by special system and on their approach viaducts, at a speed which exceeds their maximum speed limit by less than 20km/h will be subject to a fine of _____.	2,000 to 10,000 patacas.
74 /F (p18)	Driving a moped or a motorcycle, on bridges regulated by special system and on their approach viaducts, at a speed equals to or more than 30km/h above their maximum speed limit will be subject to:	A fine of 4,000 to 20,000 patacas and be suspended from driving for six months to one year.
75 /F (p18)	Driving a light vehicle on bridges regulated by special system and on their approach viaducts, at a speed equals to or more than 30km/h above their maximum speed limit will be subject to:	A fine of 4,000 to 20,000 patacas and be suspended from driving for six months to one year.
76 /F (p19)	Driving a heavy vehicle on bridges regulated by special system and on their approach viaducts, at a speed equals to or more than 20km/h above their maximum speed limit will be subject to:	A fine of 4,000 to 20,000 patacas and be suspended from driving for six months to one year.
77 /F (p19)	Anyone driving a vehicle on public road with a blood alcohol content of 0.5 grams to less than 0.8 grams of alcohol per liter of blood will be fined:	2,000 to 10,000 patacas.
78 /F (p19)	Anyone driving a vehicle on public road with a blood alcohol content of 0.8 grams to less than 1.2 grams of alcohol per liter of blood will be subject to:	A fine of 6,000 to 30,000 patacas and be suspended from driving for two to six months.

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
79 /F (p20)	When, on the second offence, the blood alcohol content is less than 0.8 grams of alcohol per liter of blood, the offending driver will be subject to:	A fine of 4,000 to 20,000 patacas and be suspended from driving for six months to one year.
80 /F (p20)	When, on the second offence, the blood alcohol content is from 0.8 grams to less than 1.2 grams of alcohol per liter of blood, the offending driver can face a maximum penalty of six-month imprisonment or:	A fine of 12,000 to 60,000 patacas and be suspended from driving for one to three years.
81 /F (p20)	A person who is declared to be a habitual alcoholic after receiving exam ordered by the Court will be suspended from driving for:	One to three years.
82 /F (p20)	Drivers have the obligation to stop when ordered by the officer controlling the traffic. Failing to do so will be fined:	600 to 2,500 patacas.
83 /F (p21)	Drivers have the obligation to stop when ordered by the officer controlling the traffic. Failing, again, to do so will be subject to:	A fine of 1,200 to 5,000 patacas and be suspended from driving for two to six months.
84 /F (p21)	Driving in the wrong direction on bridges regulated by special system and on their approach viaducts will be fined:	6,000 to 30,000 patacas and be suspended from driving for six months to one year.
85 /F (p21)	Driving in the wrong direction on bridges regulated by special system and on their approach viaducts, again, will be fined:	12,000 to 60,000 patacas and be suspended from driving for one to three years.
86 /F (p22)	Anyone who carries out the manoeuvre of turning around or reversing, when driving on bridges, flyovers or tunnels, will be fined:	2,500 to 12,500 patacas and be suspended from driving for two to six months.
87 /F (p22)	Anyone who carries out, again, the manoeuvre of turning around or reversing, when driving on bridges, flyovers or tunnels, will be fined:	5,000 to 25,000 patacas and be suspended from driving for six months to one year.
88 /F (p22)	Anyone who, when driving, carries out the manoeuvre of turning around or reversing on roads with humps, bends or junctions where visibility is poor, will be fined:	600 to 2,500 patacas.
89 /F (p22)	Anyone who, when driving, carries out the manoeuvre of turning around or reversing at locations where poor visibility or road conditions make them unsuitable for such manoeuvre, will be fined:	600 to 2,500 patacas.
90 /F (p23)	Anyone who, when driving, carries out again the manoeuvre of turning around or reversing on roads with humps, bends or junctions where visibility is poor, will be fined:	1,200 to 5,000 patacas and be suspended from driving for two to six months.
91 /F (p23)	Anyone who, when driving, carries out again the manoeuvre of turning around or reversing at locations where poor visibility or road conditions make them unsuitable for such manoeuvre, will be fined:	1,200 to 5,000 patacas and be suspended from driving for two to six months.
92 /F (p23)	Anyone who, when driving, does not yield the right of way to priority vehicles or to the vehicle fleet of the police will be fined:	600 to 2,500 patacas.
93 /F (p23)	Anyone who, when driving, does not yield the right of way to a private vehicle when this is being used to transport the injured or patients in critical condition and is signaling – especially, with its hazard warning flashers - that it is in an emergency, will be fined:	600 to 2,500 patacas.

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
94 /F (p23)	Anyone who, when driving, again does not yield the right of way to priority vehicles or to the vehicle fleet of the police will be fined:	1,200 to 5,000 patacas and be suspended from driving for two to six months.
95 /F (p24)	Anyone who, when driving, again does not yield the right of way to a private vehicle when this is being used to transport the injured or patients in critical condition and is signaling – especially, with its hazard warning flashers - that it is in an emergency, will be fined:	1,200 to 5,000 patacas and be suspended from driving for two to six months.
96 /F (p24)	Anyone who, when driving on bridges regulated by special system and on their approach viaducts, does not yield the right of way to emergency vehicles will be fined:	1,000 to 5,000 patacas and be suspended from driving for two to six months.
97 /F (p24)	Anyone who, when driving on bridges regulated by special system and on their approach viaducts, does not yield the right of way to a private vehicle when this is being used to transport the injured or patients in critical condition, will be fined:	1,000 to 5,000 patacas and be suspended from driving for two to six months.
98 /F (p24)	Anyone who, when driving on bridges regulated by special system and on their approach viaducts, again does not yield the right of way to emergency vehicles will be fined:	2,000 to 10,000 patacas and be suspended from driving for six months to one year.
99 /F (p25)	Anyone who, when driving on bridges regulated by special system and on their approach viaducts, again does not yield the right of way to a private vehicle when this is being used to transport the injured or patients in critical condition, will be fined:	2,000 to 10,000 patacas and be suspended from driving for six months to one year.
100 /F (p25)	When the driver comes to a marked pedestrian crossing, where the transit of vehicles and pedestrians or, only the transit of vehicles, is directed by the signal lights or the officer controlling the traffic, the driver – even if permitted to advance - shall allow the pedestrians who have started crossing the road to pass first. Failing to do so will be fined:	600 to 2,500 patacas.
101 /F (p25)	When the driver comes to a marked pedestrian crossing, where the transit of vehicles is not directed by signal lights or by traffic-control officer, the driver shall decelerate or stop when necessary, so as to allow the pedestrians who have started crossing the road to pass first. Failing to do so will be fined:	600 to 2,500 patacas.
102 /F (p26)	Even if there is no pedestrian crossing at the junction of the road where the driver is trying to turn into, the driver shall decelerate or stop when necessary, so as to allow the pedestrians who have started crossing the road to pass first. Failing to do so will be fined:	600 to 2,500 patacas.
103 /F (p26)	When the driver comes to a marked pedestrian crossing, where the transit of vehicles and pedestrians or, only the transit of vehicles, is directed by the signal lights or the officer controlling the traffic, the driver – even if permitted to advance - shall allow the pedestrians who have started crossing the road to pass first. Failing to do so again will be fined:	1,200 to 5,000 patacas and be suspended from driving for two to six months.
104 /F (p26)	The driver whose driving license is revoked can only apply to take the driving exam again, _____ after the sentence for the revoking is effective.	1 year

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
105 /F (p26)	It is forbidden to install, on one´s vehicle, any apparatus, device or product capable to detect the presence or interfere with the working of equipments or instruments used in the detection or record of illegal practices. Offender will be fined _____ while the apparatus, device or product involved will be confiscated and proclaimed property of the Macao SAR.	3,000 patacas
106 /F (p27)	Driving with an invalid temporary driving permit is subject to a fine of _____ if no heavier punishment is applicable under other provisions.	300 patacas
107 /R (p27)	When there are reasons to believe that, an offence or minor violation committed results from the driver’s inability or incompetence which poses obvious danger to the safety of people and property, _____. It can also order the driver to see a doctor or receive psychological assessment before taking the driving exam again, as well as give the ruling that the driver be suspended from driving before passing the exam.	the Court can order the driver to take the driving exam again.
108 /F (p27)	The Court can rule that the driving licence or the document referred in item (4) of No. 1 of Article 80 (Special Driving Permit) be revoked, when the offence committed is due to serious negligence, such as:	All of the above.
109 /F (p27)	The Court can rule that the driving licence or the document referred in item (4) of No. 1 of Article 80 (Special Driving Permit) be revoked, when the offence committed is due to serious negligence, such as:	All of the above.
110 /F (p28)	The Court can rule that the driving licence or the document referred in item (4) of No. 1 of Article 80 (Special Driving Permit) be revoked, when the offence committed is due to serious negligence, such as:	A and B.
111 /F (p28)	The Court can rule that the driving licence or the document referred in item (4) of No. 1 of Article 80 (Special Driving Permit) be revoked, when the offence committed is due to serious negligence, such as:	A and C.
112 /F (p28)	Within the period indicated in the ruling that driving be suspended or that the driving licence or the document referred in item (4) of No. 1 of Article 80 (Special Driving Permit) be revoked, the driver shall surrender the driving licence or the document referred to _____. Failing to do so will be considered an offence of disobedience.	the Public Security Police.
113 /F (p28)	The person who is liable for the fines applied, resulting from an administrative offence stated in the Road Traffic Law or supplementary regulations and that the decision to apply them has become unchallengeable, shall settle the fines before being allowed to:	A and B.
114 /F (p29)	The person who is liable for the fines applied, resulting from an administrative offence stated in the Road Traffic Law or supplementary regulations and that the decision to apply them has become unchallengeable, shall settle the fines before being allowed to:	Renew the driving licence.
115 /F (p29)	Drivers who use the mobile phone while driving will be fined:	600 patacas

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
116 /F (p29)	Before driving away or moving off, drivers shall signal their intention in advance and take necessary measures to prevent any accident. Failing to do so will be fined:	600 patacas
117 /F (p29)	Vehicles shall be driven along the left side of the carriageway and stay as close as possible to the roadside or the sidewalk while leaving sufficient room to prevent accidents. Failing to do so will be fined:	900 patacas
118 /F (p29)	Only when the access to buildings requires can vehicles be driven past the roadside or through the sidewalk. Violation will be subject to a fine of:	600 patacas
119 /F (p30)	The driver of a vehicle in motion shall keep sufficient distance from the vehicle in front and from those travelling in the same direction so as to prevent accidents. Failing to do so will be fined:	600 patacas
120 /F (p30)	A driver who intends to slow down the vehicle or move sideways shall give corresponding signals in advance so as to prevent accident. Failing to do so will be fined:	600 patacas
121 /F (p30)	Acoustic signals shall only be used to prevent accident or to transmit in advance the intention of overtaking to the driver of the vehicle to be overtaken. Violation will be subject to a fine of:	300 patacas
122 /F (p30)	When driving at night, acoustic signals shall be replaced by lighting signals. Violation will be subject to a fine of:	300 patacas
123 /F (p30)	At night or when there is not enough visibility, dipped headlights shall be used and these, when the road is well lit, shall be replaced by side lights. Violation will be subject to a fine of:	600 patacas
124 /F (p31)	It is forbidden to use full-beam headlights when the vehicle in motion is less than 100 meters away from the one in front. Violation will be subject to a fine of:	1,500 patacas
125 /F (p31)	It is forbidden to use full-beam headlights on bridges, flyovers and tunnels. Violation will be subject to a fine of:	1,500 patacas
126 /F (p31)	It is forbidden to use full-beam headlights when meeting oncoming vehicles or pedestrians. Violation will be subject to a fine of:	1500 patacas
127 /F (p31)	It is forbidden to use full-beam headlights when the vehicle is not in motion or is in halt. Violation will be subject to a fine of:	1,500 patacas
128 /F (p31)	A driver shall not suddenly decelerate without first ensuring that doing so will not cause danger to other road users. Failing to do so will be fined:	300 patacas
129 /R (p32)	The driver shall, especially, reduce speed or face a fine of 900 patacas, when:	Approaching pedestrian crossings marked on the carriageways.
130 /R (p32)	In which of the following circumstances is slow driving subject to a fine of 300 patacas?	When the driving speed is so low that it unreasonably affects other road users or that it violates the minimum speed limit.
131 /R (p32)	Which of the following actions should the driver - who has the obligation to give way and allow another vehicle to pass without having to change its speed nor direction - carry out or be fined 900 patacas?	The driver shall slow down, stop the vehicle if necessary or, reverse when meeting oncoming traffic.
132 /F (p32)	A driver shall yield the right of way to the vehicles from the left. Failing to do so will be fined:	900 patacas

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
133 /F (p33)	When two oncoming vehicles meet but cannot pass each other due to obstruction on the road, the driver who has to bypass the obstruction shall slow down or stop the vehicle so as to give way to the other. Failing to do so will be fined:	900 patacas
134 /F (p33)	Overtake on the right. Failing to do so will be fined:	900 patacas
135 /F (p33)	Overtake on the left, when the driver of the vehicle you intend to overtake has signalled the intention to turn right and has left you room on the left side of the road. Failing to do so will be fined:	900 patacas
136 /F (p33)	A driver shall not start to overtake without first ensuring that doing so will not cause the danger of colliding with another vehicle travelling in the same or opposite direction. Failing to do so will be fined:	900 patacas
137 /F (p33)	After overtaking, the driver shall return to the original lane as soon as possible given that such move will not cause danger to other road users. Failing to do so will be fined:	900 patacas
138 /F (p34)	When no obstruction exists, a driver shall give way for overtaking, keep as much as possible to the left and do no accelerate before the overtaking is completed. Failing to do so will be fined:	600 patacas
139 /F (p34)	When the width, evenness or state of conservation of the carriageway makes safe overtaking impossible, the heavy vehicles, industrial vehicles and vehicles travelling at low speed shall slow down or stop to give way for overtaking. Violation will be subject to a fine of:	600 patacas

GROUP E | Driving safety | 116 questions

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
1 /R (p3)	Vehicles in transit should keep a safe distance between each other:	So that there will be enough room and time to react when someone changes lane arbitrarily or overtakes without following the established rules, and when the car in front brakes suddenly.
2 /F (p3)	Safe distance can be measured by two simple ways:	By driving speed or by seconds.
3 /F (p3)	When using driving speed to calculate the safe distance, the minimum following distance to be kept is, in general, obtained by:	For large vehicles, deducting 20 from the speed and, for small vehicles, dividing the speed by 2.
4 /F (p3)	Under normal weather conditions, the safe distance calculated in seconds is:	For small vehicles, a following distance of at least two seconds and, for large vehicles, at least three seconds.
5 /F (p4)	To calculate the safe distance in seconds for small or large vehicles, you should use a fixed point as reference and, once the vehicle in front of you has passed that point:	Count for 2 to 3 seconds. If your vehicle has passed the fixed point before the counting is completed, it means that the distance is not sufficient and should be increased by slowing down your vehicle.
6 /R (p4)	For safety reasons, when a vehicle is following you too closely:	Do not brake suddenly. You should gently apply the brakes to allow the driver of the vehicle behind to have sufficient time to react and, ideally, to slow down and increase the distance from your vehicle.
7 /R (p4)	Before slowing down or stopping your vehicle:	You should alert in advance the drivers behind by using the corresponding signals, so as to let them know your intentions as soon as possible.
8 /R (p5)	If the vehicle behind is driving too closely to yours and there is no room for you to move forward, in this situation:	You can gently apply the brakes to notify the vehicle behind to keep a distance or, when conditions allow, change lane.
9 /R (p5)	You are on the right lane (overtaking lane) and the vehicle behind is driving very closely to yours. If, at this moment, it is not possible for you to speed up and distance yourself from the vehicle behind:	You should move to the left lane, allow the vehicle behind to pass and then decide whether or not to return to the original lane.
10 /R (p5)	Under adverse weather conditions with poor visibility, especially, when there is dense fog, strong wind or torrential rain, it becomes more difficult to drive. The only way to handle the situation is:	To decelerate and drive slowly.
11 /F (p5)	Under adverse weather conditions with poor visibility, the driver should slow down and drive at less than:	40 km/hour
12 /R (p6)	Under adverse weather conditions with poor visibility, the driver should slow down while paying attention to the vehicles behind. If they are following closely, the driver should:	Slow down gradually instead of brake suddenly.
13 /F (p6)	Under adverse weather conditions, a bigger following distance should be kept and this corresponds to, approximately:	Two times the normal following distance.
14 /R (p6)	Under adverse weather conditions, the driver should keep a bigger following distance, as well as:	Hold the steering wheel firmly.
15 /R (p6)	Vehicles travelling under adverse weather conditions should have their headlights, hazard warning flashers or fog lights turned on and the driver:	Should not change lane unless it is absolutely necessary to do so.
16 /R (p6)	When you drive a manual transmission vehicle, you should shift to low gear before going uphill, in order to:	Prevent engine stalling or vehicle breakdown.
17 /R (p7)	When you drive an automatic transmission vehicle, you should shift to a gear for climbing before going uphill, in order to:	Prevent the vehicle from losing power when climbing, thus causing damage to the engine because of overload.
18 /R (p7)	If, due to traffic signals or congestion, you have to stop briefly while going uphill:	You should keep an adequate distance from the vehicle in front to prevent collision, in case it rolls backward when it moves off.

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
19 /F (p7)	To start a manual transmission vehicle uphill after stopping, you should press down the clutch pedal and:	Shift to first gear, slowly relax the clutch and gently press down the accelerator until the sound of the engine changes, then release the handbrake, continue to accelerate and release the clutch.
20 /F (p8)	To start an automatic transmission vehicle uphill after stopping, you can shift to a low gear (L or second gear):	Or gently press down the accelerator pedal in order to increase engine rotation speed and maintain the power necessary for climbing.
21 /F (p8)	To park a manual transmission vehicle uphill, you should:	Apply the handbrake and shift to the lowest gear, place wedges such as rocks or blocks of wood behind the vehicle’s rear tyres to prevent it from rolling backward.
22 /F (p8)	To park an automatic transmission vehicle uphill, you should:	Apply the handbrake and shift to P mode, place wedges such as rocks or blocks of wood behind the vehicle’s rear tyres to prevent it from rolling backward.
23 /F (p9)	When driving down a long or steep hill:	You should shift to low gear to reduce speed, thus using the so called “engine braking”.
24 /F (p9)	When driving a manual transmission vehicle down a long hill, the driver:	Should try to apply the brake pedal at the start of the descend to decelerate and shift to low gear but, in order to avoid brake failure, should not drive at high speed and brake suddenly.
25 /F (p9)	Because an automatic transmission vehicle is hydraulically operated, its engine braking effect is not as direct and effective as on a manual transmission vehicle. Therefore, when going down a long hill, the driver of an automatic transmission vehicle:	Should use engine braking in advance to prevent the vehicle from going downhill too fast.
26 /F (p9)	To park a manual transmission vehicle downhill, you should:	Apply the handbrake and shift to reverse mode, then place wedges in front of the vehicle’s front tyres to prevent it from rolling downward.
27 /F (p10)	To park an automatic transmission vehicle downhill, you should:	Apply the handbrake and shift to P (park) mode, then place wedges in front of the vehicle’s front tyres to prevent it from rolling downward.
28 /R (p10)	When you come to an intersection:	You should pay attention to vehicles that change lane suddenly to turn left or right, so as to avoid lateral collision.
29 /R (p10)	When you come to an intersection and the green light is still on:	You should decelerate and check if there are vehicles on the side road that have jumped the red light.
30 /R (p10)	When making a left turn:	You should pay special attention to the possible presence of people on the pedestrian crossing. Also, be careful with and maintain a safe distance from pedestrians or vehicles that are at the back on the left side of your vehicle.
31 /R (p11)	When the green light that indicates you can go straight ahead is on but the intersection is blocked with traffic:	You should not enter the intersection and pause there. You should wait behind the stop line.
32 /R (p11)	You come to an intersection and notice that the amber light is on:	You should stop behind the stop line or, if you have already entered the intersection, drive through it as soon as possible.
33 /R (p11)	When the red light is on:	You must stop behind the stop line because it is very dangerous to jump a red light.
34 /R (p11)	Both yours and the vehicle from the side road intend to turn right or go straight ahead. Both come, at the same time, to a four-way intersection with no traffic signs:	The vehicle on the left has right-of-way.
35 /R (p12)	When driving past alleys or street corners:	You should slow down and, at daytime when it is allowed, honk the horn to ensure that you can pass the location safely.
36 /R (p12)	Be careful when you drive on a one-way street because there may be motorcyclists who travel on the reverse direction illegally, therefore:	You should be prepared to brake.
37 /R (p12)	When you turn a curve:	Do not drive too close to the inner side of the curve. You should edge out your vehicle and turn slowly, because the vehicle at the corner may not be aware of your intention and if you turn too quickly, you may collide into it.

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
38 /R (p12)	At some alleys or street corners, the houses, cars, signboards or trees can block the vision of drivers and make them unable to see those vehicles coming from the side road. In this case:	They should slow down and make sure that there are no vehicles coming from the side road before moving forward.
39 /R (p13)	When driving at night, you should:	Slow down and use full-beam headlights so you can see better on poorly lit streets, but you should dip your headlights when there are vehicles coming from the opposite direction.
40 /R (p13)	When you are driving at night and the lights of oncoming traffic are too strong for your eyes:	You can divert your eyes and look to the left edge of the road so as to prevent being dazzled.
41 /R (p13)	When you are driving at night and the lights from oncoming traffic are so strong that they dazzle you:	It takes several seconds for your eyes to recover and these are very dangerous moments because you are driving as if with closed eyes.
42 /R (p14)	When you are driving at night, whether or not the oncoming traffic is using full-beam headlights:	It is advisable to dip your headlights and then, after the traffic has passed, use your full-beam headlights, so that your eyes can better adapt to the change of lights.
43 /R (p14)	When driving at night, you notice that the vehicle in front is zigzagging and you come to the conclusion that its driver is in an unstable mental state. In this case:	You should try to alert its driver and maintain, as much as possible, a safe distance from it.
44 /R (p14)	At night, when you drive past roads with curves, junctions or intersections where there are underlying dangers:	You should use alternately the full-beam headlights and the dipped headlights.
45 /R (p15)	When you drive past streets where there are vehicles double parked illegally:	You should slow down, pay attention to the parked vehicles and the oncoming traffic.
46 /R (p15)	How do you determine that the vehicles double parked illegally intend to leave?	By their lights, wheels’ movements or exhaust pipe emissions.
47 /R (p15)	When you drive past streets where there are vehicles double parked illegally, you should pay attention as they may start moving and leave. You should also:	Be aware of the possible dashing out of pedestrians and vehicles.
48 /R (p15)	On congested roads, normally the vehicles will travel at low speed and serious collisions will not occur. However, many have the tendency to try to cut in front of other drivers, causing four to five lines of traffic to appear on, e.g., a three-lane road, thus creating the risk of collisions. To prevent this from happening, when travelling on a congested road, the driver should:	Remain on the same lane and do not change it at will, as well as, maintain a safe following distance.
49 /R (p16)	When there is the need to change lane during traffic congestion:	The driver must turn on the direction indicator first and then proceed to change lane with caution.
50 /R (p16)	Special attention should be paid to those vehicles travelling closely alongside yours on a congested road because, with the little distance in between:	Any of their movement can lead to minor collisions among the vehicles.
51 /R (p16)	On congested roads:	A driver should not accelerate suddenly otherwise the vehicle could crash into the one in front.
52 /R (p17)	When you drive past roads with accumulated water and its level is below the bumper:	You should use low gear with high engine torque to drive through the water quickly when conditions are safe, so as to prevent the water from entering the exhaust pipe and stalling the engine.
53 /R (p17)	When you drive past a road and it is under deep water:	It is advisable to use another road because forcing your way through deep water can cause engine breakdown.
54 /R (p17)	Roads with thin layers of water are slippery. When you drive on them:	You should slow down; do not rush especially when you move off and do not turn the steering wheel sharply.
55 /F (p18)	Driving on a road made slippery by thin layers of water requires:	More than 2.5 times the normal braking distance and a driving speed at least 20% lower than the normal one.
56 /R (p18)	After driving through water:	The driver should press down the brake pedal gently to dry the water in the brake drums, so that the brakes can regain effectiveness.

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
57 /R (p18)	If a vehicle skids while travelling on a road which is wet with water, its driver:	Must not brake suddenly because doing so can cause the vehicle to spin or veer off the lane.
58 /R (p19)	If a vehicle skids while travelling on a road which is wet with water, its driver:	Should hold the steering wheel firmly, steer in the same direction as the rear wheels are skidding until the vehicle straightens, then gently press down the accelerator to gradually speed up.
59 /R (p19)	When you drive past a site where there is ongoing road work:	You should reduce speed according to the traffic warning signs placed there and change lane carefully if there is lane closure.
60 /R (p19)	When you drive past a site where there is ongoing road work, especially those road sections covered by metal plates, besides paying attention to the condition of the structure of the road work, you should also:	Reduce speed. If not, the vehicle will easily skid and cause accidents.
61 /R (p20)	On sections where there is ongoing road work, you are not to reverse, turn around, overtake or stop. You are to:	Keep adequate following and lateral distance between vehicles in case they skid.
62 /R (p20)	When you drive past a site where there is ongoing road work, you should pay attention to the operating area of the heavy machines and:	Stay out of their way.
63 /F (p20)	When driving on bad roads like those covered with gravel or mud, instead of stopping, you should keep the vehicle moving so that it can regain momentum more easily. Also, it is advisable for you to, in general:	Use the second gear which makes your vehicle fairly powerful though not too fast in speed.
64 /R (p20)	If your vehicle is stuck in mud when travelling on a bad road:	To prevent the wheels from spinning but not moving, thus sinking deeper into the mud, you should not accelerate too hard.
65 /R (p21)	The steps to get a manual transmission vehicle out of mud are:	First, shift to the first gear (or the reverse gear), press down the clutch to accelerate gradually and, at the same time, release the clutch slowly, so as to increase rolling force while maintaining a moderate speed.
66 /R (p21)	The steps to get an automatic transmission vehicle out of mud are:	First shift to “D” mode (or to reverse gear), accelerate slowly to increase the rolling force and maintain a moderate speed. The gear for acceleration or climbing can be used at this time to increase power.
67 /R (p22)	When a vehicle is stuck deep in mud, you can use a jack to lift it up, place wood blocks or rocks under its tyres and then start it. But, when it is not possible to use a jack:	You can reduce the pressure of the tyres that are stuck and spinning so as to increase the friction between them and the road surface, place wood blocks or rocks under the tyres and then use low gear to accelerate slowly, thus free the vehicle from the mud.
68 /R (p22)	Vehicles used for transporting sand are large and heavily loaded, usually they have big blind spot and require a brake distance much longer than that of a heavy vehicle. Therefore, when travelling behind such vehicles:	You should increase the following distance so as to avoid collisions and accidents caused by objects fallen off them.
69 /R (p23)	Although there is no need to worry too much about being hit by unknown objects, drivers who are travelling in front a vehicle transporting sand and gravel should pay attention to their surroundings and, especially:	They should not brake suddenly, otherwise the vehicle behind could crash into them.
70 /F (p23)	Large vehicles often block the view of small vehicle drivers travelling behind and make them unable to discern the road condition ahead. Therefore, it is necessary to keep a bigger distance when travelling behind large vehicles, so that there will be more time to react when the unexpected happen. For this purpose, the normal safe distance should be increased in:	50%
71 /R (p23)	When driving behind large vehicles, you should keep a bigger following distance in order to be safe, and:	You should change lane so that you do not share the same one with the large vehicles, as well as avoid travelling alongside them.

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
72 /R (p24)	There are large vehicles that do not respect the traffic rules. They tailgate the small vehicles and flash their headlights to threaten them. Such illegal behaviours, of course, need to be eliminated. Meanwhile, if you happen to travel in front of one of these large vehicles, you need to find ways to protect yourself. Which of the following is the most recommended?	All of the above.
73 /R (p24)	Large vehicles have a wide body and the distance between their front and rear axles are long, therefore, they need a large turning radius. As a result, when a large vehicle is making a right turn:	Its front part will go slightly to the left before turning to the right. It is common to see the direction indicator of large vehicles to show a right-turn when their front part is turned to the left.
74 /R (p25)	When large vehicles make a right-turn, after their front part has turned right:	The body and the rear part will go slightly to the left until the turn is completed. The longer their body, the larger the rotation radius and the area swept by the rear.
75 /R (p25)	When the large vehicle in front of you is making a right-turn:	You should slow down or, stop and wait until the turn is completed before moving off.
76 /R (p25)	When the large vehicle in front of you is making a right-turn:	You should not be hasty and overtake it on the left, so as to avoid impact with the rear of the large vehicle.
77 /R (p26)	When the large vehicle in front of you is making a left-turn:	You should not be hasty and overtake it on the right, so as to avoid impact with the rear of the large vehicle.
78 /R (p26)	If you are travelling alongside a large vehicle and it tries to turn to your side (that is, you are on its right side and it is making a right-turn or, you are on its left side and it is making a left-turn):	You should slow down or, stop your vehicle to give way to the large vehicle to carry out the turn.
79 /R (p26)	If you are travelling alongside a large vehicle and it tries to turn away from you (that is, you are on its right side and it is making a left-turn or, you are on its left side and it is making a right-turn):	You should maintain a bigger distance from the large vehicle so as to ensure your own safety.
80 /R (p27)	On a two-way four-lane road, if there is a large vehicle that shows no respect for the traffic rules, e.g., in order to turn left, it uses the outside lane and turns directly into the side road or, for making a right-turn, it occupies the inside lane and forces its way to the right. Its actions block traffic and endanger the other vehicles around. Therefore, drivers who find themselves in these situations should:	All of the above.
81 /R (p27)	The back of a large vehicle is a blind spot for its own driver and there is a part of this area that, even with the help of the rearview mirror for checking the sides, its driver cannot see. Therefore, when a large vehicle goes in reverse, there should be someone to help to give instructions to its driver. However, if there is no one to help, the driver who is travelling behind the large vehicle:	Should honk the horn as warning and, if possible, move back to give more space to the reversing large vehicle or, change lane to avoid any risk.
82 /R (p28)	Some drivers of large vehicles like to travel at high speed and change lanes frequently for overtaking. In this case:	Those travelling in front of a large vehicle should move slightly to the left side to make it easier for the large vehicle to change lane or overtake and, in order to show their intention to give way for overtaking, use the left indicator.
83 /R (p28)	Some drivers of large vehicles like to travel at high speed and change lanes frequently for overtaking. In this case:	Those travelling behind on the right side of a large vehicle should, upon knowing its intention to change to the right lane, slow down when conditions allow so as to give way to it.
84 /R (p28)	Some drivers of large vehicles like to travel at high speed and change lanes frequently for overtaking. In this case:	Those travelling behind on the left side of a large vehicle should be careful as it may try to overtake on the left. Therefore, they should maintain a safe distance and give way to it.

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
85 /R (p29)	When a heavy vehicle used for the public transportation of passengers comes to its stop and is picking up/setting down passengers, it is advisable for the vehicles travelling behind it to also stop and wait for it to move off. If the heavy vehicle, after stopping, is very close to the side of the road and is not blocking the lane, the vehicles following it can pass it. However:	They should stay alert as the heavy vehicle will move off when it finishes picking up/setting down passengers. Therefore, they should try to pass it before it begin to drive away and, at the same time, pay attention to those pedestrians who may dash out in front of the heavy vehicle.
86 /R (p29)	For those vehicles travelling on the left side of a heavy vehicle which is used for the public transportation of passengers, when it is trying to approach its stop:	The best thing to do is to slow down and give way to it. Their drivers have to honk the horn as warning if they find themselves at the blind spot of the heavy vehicle.
87 /R (p30)	Commercial vehicles used for transporting passengers or goods will make stops at the side of a road while others, like school vans and buses, will load/unload children along the way. All of them need to make frequent stops at the roadside with each stop lasting for a certain period of time. A driver, who is travelling behind, should be aware of the need of these vehicles. When they show signs of intending to make a stop at the roadside, for the driver who is following them:	It is preferable to slow down, change slowly to the right lane and pass them.
88 /R (p30)	After the commercial vehicles have finished picking up/setting down passengers/goods and, after the school vans have finished loading/unloading children, they move off. If, at this moment, you drive past them on their right side:	You should pay attention to their movements so as to avoid accidents.
89 /R (p30)	In general, school vans and buses, as well as commercial vehicles looking for customers, do not travel at high speed. Therefore, when you meet them on the road, you should:	Maintain a safe distance so as to protect yourself and the passengers.
90 /R (p30)	Some taxis speed up or exceed the speed limit, overtake or change lanes arbitrary when they have passengers on board. If you are travelling in front of these commercial vehicles:	It is advisable to try to stay away from them.
91 /R (p31)	When a vehicle prepares to stop at the roadside, it should use its left indicator to signal its intention and alert those following it, especially the motorcycles, and:	The motorcycles need to slow down and do not overtake on the left. The vehicle can then move slowly to the left and stop.
92 /R (p31)	The balance of a motorcycle depends on its two wheels. Travelling at high speed on a wet and slippery road, or one that is uneven, a motorcycle will easily fall. A car driver who happens to witness a motorcycle falling should:	Under safe conditions, immediately stop the car and use the direction indicators to alert other vehicles travelling behind, then get off and provide assistance.
93 /R (p31)	Sudden brake failure seldom happens. Normally, there will be signs before it happens and the driver can prevent such failure by carrying out careful inspection and maintenance. However, if sudden brake failure happens, the driver should act immediately and apply emergency safety measures to minimize injury and loss. These measures are:	Immediately turn on the hazard warning flashers, apply engine braking and gradually shift to low gear to reduce speed, then slowly pull up the handbrake to further decelerate until the vehicle comes to a stop.
94 /R (p32)	If brake failure happens and, after applying the necessary emergency measures such as gradually shifting to low gear and pulling up the handbrake, the desired effects cannot be achieved, the driver can only:	Be prepared to make a side impact and have the side of the vehicle brush against the protective railings and other soft surfaces and objects along the road, so as to use the force of friction to stop the vehicle.
95 /R (p32)	When you are driving and you feel that the steering wheel is leaning to one side or shaking, or that the vehicle is trembling, it is possible that:	A tyre is punctured or flat.
96 /R (p32)	When a tyre is punctured or flat, the loss of air loosens the tyre from the wheel:	When this happens, you must not brake suddenly because doing so could cause the vehicle to lose control or overturn.

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
97 /R (p32)	When a tyre is punctured or flat, the driver should:	All of the above.
98 /R (p33)	When you encounter an accident on an expressway, you should avoid braking suddenly:	Because the vehicle is travelling at high speed and there is not enough distance to brake safely, also because it can easily lead to chain-reaction crash between the vehicles travelling behind you.
99 /F (p33)	You are on an expressway. Suddenly, an accident happens ahead and you are forced to brake immediately. If your vehicle does not have anti-lock braking system (ABS), it is preferable to pump your brakes so as to:	Prevent brake pads failure or lock-up due to overheating.
100 /R (p33)	On an expressway, when you find yourself travelling behind a vehicle loaded with heavy goods, you should increase your following distance so as:	To prevent fallen goods from damaging your vehicle and to avoid collision by allowing more time to react when the unexpected happen.
101 /R (p33)	If you intend to change lane on an expressway, you should check with your rearview mirror, pay attention to the movement of the vehicles around you and use the direction indicator for at least 10 seconds. Then, check again with your rearview mirror the movement of the vehicles on your target lane and:	After ensuring that all is safe, turn the steering wheel slowly and change to the next lane with calm.
102 /R (p34)	When faced with someone who changes lane inappropriately on an expressway, a driver should:	Take immediate measures intended to lower the probability of an accident.
103 /R (p34)	When faced with someone who tries to change to your lane on an expressway:	Do not speed up with the intention to prevent the lane changing.
104 /R (p34)	On an expressway, if there is a vehicle on the next lane trying to change to yours:	You should immediately honk your horn lightly or use your full-beam headlights to alert it and decelerate.
105 /R (p34)	If there is a large vehicle on an expressway forcing its way into your lane:	You should slow down and press the brake lightly to warn the vehicle travelling behind you, but you must not leave your lane nor brake suddenly.
106 /R (p34)	When you need to change lane on an expressway, besides following the driving rules, you have to pay attention to the traffic on your target lane and, if a vehicle suddenly approaches:	You should hold off the lane changing even though the approaching vehicle is some distance away.
107 /R (p35)	When you need to change lane on an expressway and the vehicle behind you uses flashing lights to alert you:	You should hold off the lane changing and decide about it later, when it is safe.
108 /F (p35)	Overtaking on an expressway is a high risk manoeuvre, therefore, it is very important to pay attention to the situations both in front and behind your vehicle:	You should only overtake when you are certain that your speed is at least 10Km/h faster than the vehicle in front.
109 /F (p35)	On an expressway, before you start to overtake:	You should turn on the right indicator for 3 consecutive seconds, then accelerate within the speed limit and gradually steer to the right lane.
110 /R (p36)	To carry out the overtaking manoeuvre on an expressway, after having moved to the right side and past the vehicle on your left, you should:	Maintain a certain distance and turn on your left indicator. Only when the vehicle you overtook appears in the rearview mirror can you go back to your original lane.
111 /R (p36)	You are driving on an expressway and you notice that the vehicle behind intends to overtake you:	You should, when safe, slow down and allow yourself enough distance to react when the unexpected happens.
112 /R (p36)	When you are driving on an expressway:	You should not compete with other vehicles nor overtake one another.
113 /R (p36)	When you are travelling on an expressway:	You should constantly observe the rearview mirror and pay attention to the movements of the vehicles behind you.
114 /R (p37)	When you intend to overtake on an expressway:	Besides paying attention to the movement of the vehicles in front of you and to your right, you should also check if the vehicles behind you on your lane also have the intention to overtake.
115 /R (p37)	When you intend to go back to your original lane after overtaking on an expressway:	You should keep a certain distance from the vehicle you have overtaken and observe its movement to ensure safety, before going back to your original lane.

Q / TYPE	QUESTION CUE (SOURCE STEM)	CORRECT ORIGINAL WORDING
116 /R (p37)	On an expressway, when two vehicles which are travelling one behind another try to overtake at the same time, an accident can easily happen. If the vehicle behind has started to change lane for overtaking:	The vehicle in front should not overtake.

11 Original visual study sheets

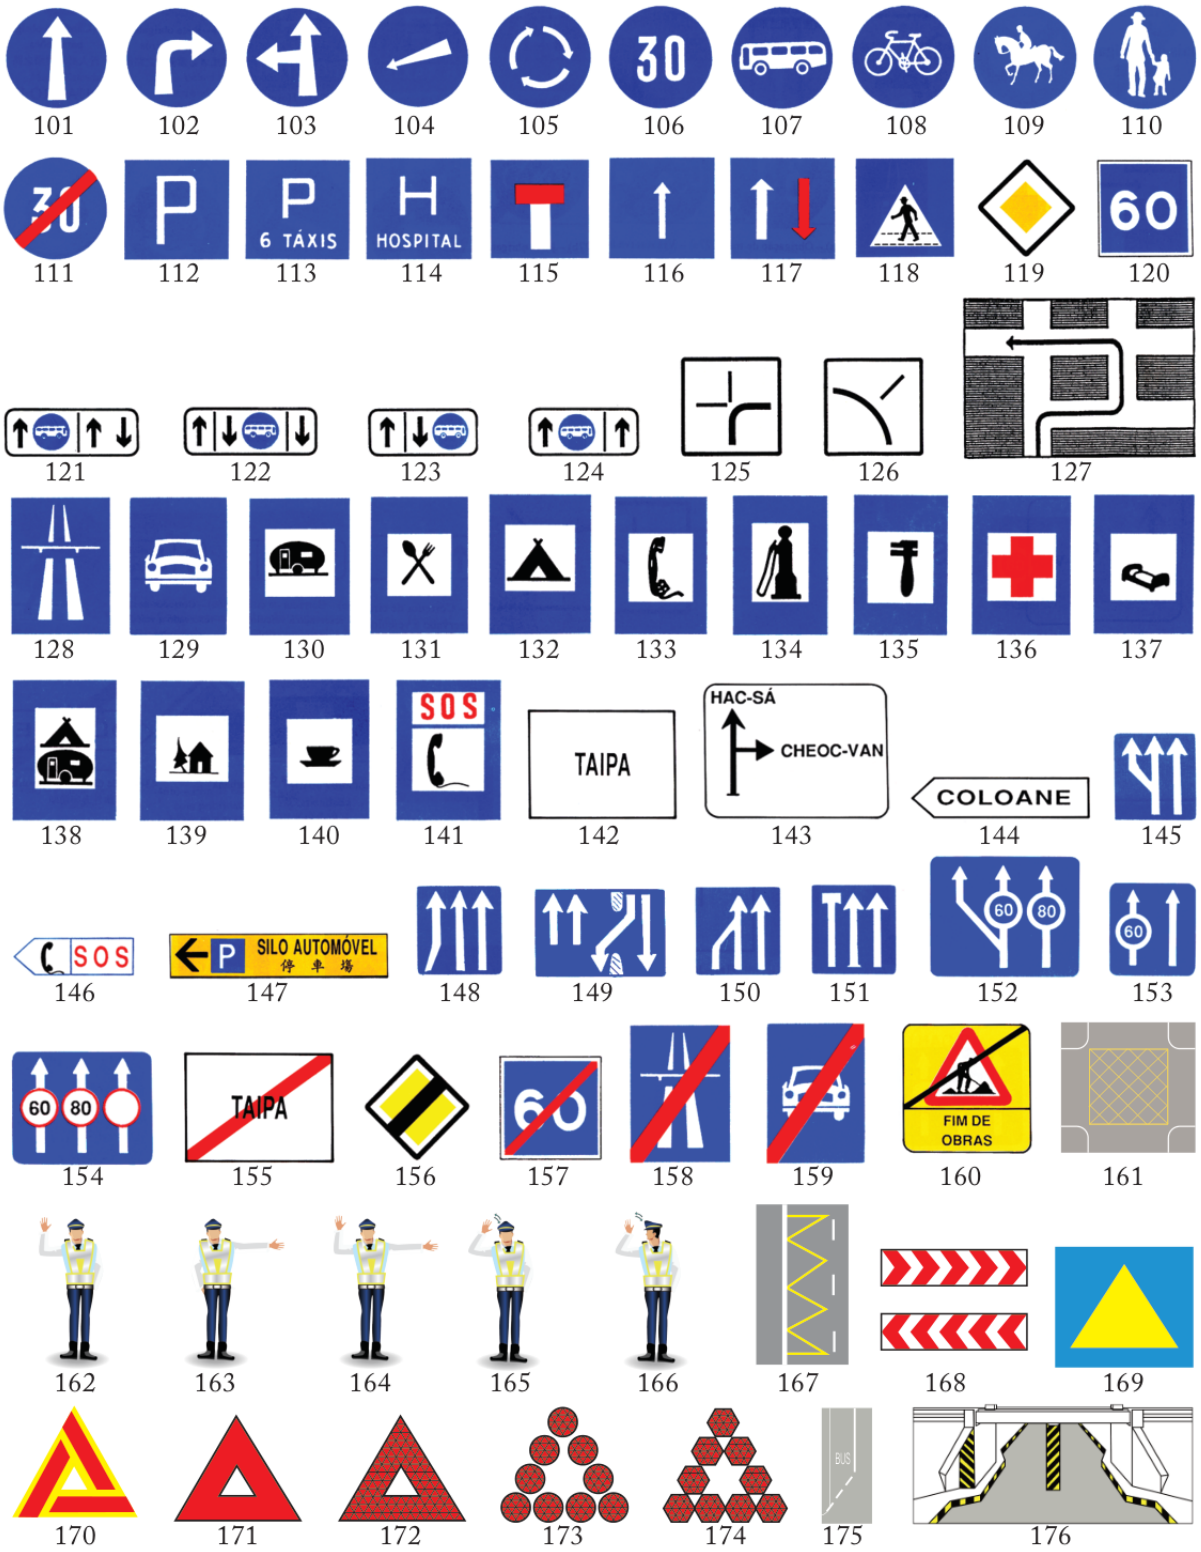

The following seven pages reproduce the last visual reference sheets of Fascicule I and Fascicule II. They are included so that every figure mentioned in the index can be revised visually. Zoom in on the PDF to see small signs and vehicle movements.

Sources, scope & verification

• **Group A — Traffic Signs:** 176 questions extracted from the uploaded Transport Bureau 2014 second-version PDF; correct answer associated using its printed SOLUTIONS table.

• **Group B — Road Situations:** 66 questions extracted from the uploaded Transport Bureau 2014 second-version PDF; correct answer associated using its printed SOLUTIONS table.

• **Group C — Traffic Regulations:** 150 questions extracted from the uploaded Transport Bureau 2014 second-version PDF; correct answer associated using its printed SOLUTIONS table.

• **Group D — Traffic Offences and Penalties:** 139 questions extracted from the uploaded Transport Bureau 2014 second-version PDF; correct answer associated using its printed SOLUTIONS table.

• **Group E — Driving Safety:** 116 questions extracted from the uploaded Transport Bureau 2014 second-version PDF; correct answer associated using its printed SOLUTIONS table.

Extraction checks: all question numbers were found once per fascicule; each question has four option texts (including the unusual Portuguese label “Resposta” for A Q176); all 647 were successfully matched to one keyed option. Three Question 96 items omit the usual closing parenthesis and were deliberately handled. The guide preserves the publisher’s answer key even where its wording seems awkward.

Classification is a study-design choice, not a claim that each question can be answered without first learning rules. Page references in the index are the actual PDF page numbers, not the printed bottom-page numbering. B figure labels A/B/C/D designate vehicles or routes within the illustration and must not be confused with multiple-choice positions.

Limitations: You told me that the real online exam will only reorder the answer options. That assumption was used to optimise this manual; it is not independently verified here. Because the booklets are dated 2014 and explicitly allow revision, check any newer official practice bank against this manual before depending on exact answer wording.
